

Unidades de comunicación Multicom

Las unidades Multicom han sido diseñadas para funcionar con un único dispositivo o con dos dispositivos de paso, lo que permite su uso en instalaciones sencillas o en comunicaciones de un área o en un conjunto de zonas de edificio.

Equipadas con un circuito de auto-aviso o las opciones de los sensores de los edificios industriales. Por ello, se ha puesto especial cuidado en reducir cualquier aspecto derivado de los vibraciones, ruidos, interferencias y mantenimiento, que están contemplados como acciones más críticas para asegurar la fiabilidad de la unidad de una forma independiente y compatible con el sistema de seguridad.

La amplia gama de valores permite una gran flexibilidad para obtener el nivel de comunicación deseado en la instalación, pudiendo seleccionar el nivel más alto en una zona libre de interferencias o con interferencias considerables de potencia entre PMA.

En función del nivel de comunicación de unidades entre dispositivos se disponen las siguientes opciones:
