Landmark operates one 8-hours shift a day with an effective production time of 7 hours per shift after adding allowances for morning and afternoon breaks. Also, Landmark works 6 days a week after taking Fridays away.

The plant is currently designed to produce 2 batches per shift and operating a single shift per day. To increase the market share Landmark should produce 17,000 per month. Landmark Auto Parts has hired you to help determine how it can produce 17,000 U-Bolts per month.

- Diagram the process using the process flow chart techniques discussed in class.
- Analyze the current capacity of the process.
- What is the effect of setup times on the production rate of each process?
- Provide two alternative strategies to increase the monthly production capacity to 17,000 U-Bolts.
