

6. When you are done, save your proof as Proof Conditional 3.
 Congratulations

The default and generous uses of the biconditional rules are exactly like those for the conditional connective, and **Add Support Steps** works exactly as you would expect.

Exercises

- 8.17 If you skipped any of the **You try it** sections, go back and do them now. Submit the files Proof Conditional 1, Proof Conditional 2, and Proof Conditional 3.

In the following exercises we return to the patterns of inference discussed in Exercise 8.1. Some of these are valid, some invalid. For each valid pattern, construct a formal proof in Fitch. For each invalid pattern, give a counterexample using Tarski's World. To give a counterexample in these cases, you will have to come up with sentences of the blocks language that fit the pattern, and a world that makes those specific premises true and the conclusion false. Submit both the world and the sentence file. In the sentence file, list the premises first and the conclusion last.

- 8.18 **Affirming the Consequent:**
 From $A \rightarrow B$ and B , infer A .

- 8.19 **Modus Tollens:**
 From $A \rightarrow B$ and $\neg B$, infer $\neg A$.

- 8.20 **Strengthening the Antecedent:**
 From $B \rightarrow C$, infer $(A \wedge B) \rightarrow C$.

- 8.21 **Weakening the Antecedent:**
 From $B \rightarrow C$, infer $(A \vee B) \rightarrow C$.

- 8.22 **Strengthening the Consequent:**
 From $A \rightarrow B$, infer $A \rightarrow (B \wedge C)$.

- 8.23 **Weakening the Consequent:**
 From $A \rightarrow B$, infer $A \rightarrow (B \vee C)$.

- 8.24 **Constructive Dilemma:**
 From $A \vee B$, $A \rightarrow C$, and $B \rightarrow D$, infer $C \vee D$.

- 8.25 **Transitivity of the Biconditional:**
 From $A \leftrightarrow B$ and $B \leftrightarrow C$, infer $A \leftrightarrow C$.

Use Fitch to construct formal proofs for the following arguments. In two cases, you may find yourself re-proving an instance of the law of Excluded Middle, $P \vee \neg P$, in order to complete your proof. If you've forgotten how to do that, look back at your solution to Exercise 6.33. Alternatively, with the permission of your instructor, you may use **Taut Con** to justify an instance of Excluded Middle.

- 8.26 $\vdash P \rightarrow (Q \rightarrow P)$

- 8.27 $\vdash (P \rightarrow (Q \rightarrow R)) \leftrightarrow ((P \wedge Q) \rightarrow R)$

Logic, Reasoning, and Rationality Erik Weber, Dietlinde Wouters, Joke Meheus, 2014-08-06 This book contains a selection of the papers presented at the Logic Reasoning and Rationality 2010 conference LRR10 in Ghent. The conference aimed at stimulating the use of formal frameworks to explicate concrete cases of human reasoning and conversely to challenge scholars in formal studies by presenting them with interesting new cases of actual reasoning. According to the members of the Wiener Kreis, there was a strong connection between logic reasoning and rationality and that human reasoning is rational in so far as it is based on classical logic. Later, this belief came under attack and logic was deemed inadequate to explicate actual cases of human reasoning. Today, there is a growing interest in reconnecting logic reasoning and rationality. A central motor for this change was the development of non-classical logics and non-classical formal frameworks. The book contains contributions in various non-classical formal frameworks, case studies that enhance our apprehension of concrete reasoning patterns, and studies of the philosophical implications for our understanding of the notions of rationality.

The Method of Socratic Proofs Dorota Leszczyńska-Jasion, 2025-06-13 This book contains a systematic and formal attempt to model solutions to problems such as: Is it possible to prove a question? Is it possible to prove something by the use of questions? Do the existing paradigms in the logic of questions allow one to combine questions and proofs? What are the results in this field? In developing answers, the book focuses on the applications of the method of Socratic proofs and goes beyond that. It starts out with an overview of the leading paradigms, issues, problems, and ready solutions in the logic of questions and places Inferential Erotetic Logic and the method of Socratic proofs against a wider background. It then introduces these two methods in more detail and explains how they can be used for classical logic, intuitionistic propositional logic, and for basic modal logics. Next, the book deals with issues specific to the field of the logic of questions, introducing the tools of Minimal Erotetic Semantics (MiES). The final chapters describe the translations between proof systems from a Socratic transformation derived in an erotetic calculus into a sequent system.

The Connectives Lloyd Humberstone, 2011 In *The Connectives*, Lloyd Humberstone examines the semantics and pragmatics of natural language sentence connectives and, or if not giving special attention to their formal behavior according to proposed logical systems, and the degree to which such treatments capture their intuitive meanings. It will be an essential resource for philosophers, mathematicians, computer scientists, linguists, or any scholar who finds connectives and the conceptual issues surrounding them to be a source of interest.

Essays in Logical Philosophy Andrzej Wisniewski, 2013 This collection of papers is written in the spirit of what is nowadays called Logical Philosophy. The topics addressed include skepticism and the criterion of truth, situational semantics, computational aspects of possible worlds semantics, and question-answer systems, occurrent beliefs, the logical omniscience paradox, paraconsistency, and models of explanatory procedures.
