Cracking the TAAS. Elizabeth Miller, 2000. The Princeton Review realizes that acing the TAAS Exit Level Math exam is very different from getting straight A's in school. TPR doesn't try to teach students everything there is to know about math; only what they'll need to know to score higher on this exam. There's a big difference. In *Cracking the TAAS Exit Level Math*, The Princeton Review will teach test takers how to think like the test makers. This is accomplished by teaching students how to eliminate answer choices using the Process of Elimination and other techniques. Use techniques such as Ballparking to save time and raise scores. Improve scores by focusing on the material most likely to appear on the test. Test one's knowledge with review questions for each math concept covered. Nail even the toughest questions: fractions, word problems, algebra, geometry, and more. Dodge the traps and pitfalls that cost test takers points. This book includes 2 full-length simulated Exit Level Math exams. All of TPR's sample test questions are just like the ones test takers see on the actual exams, and every solution is fully explained.

Contents include: Part I: Introduction About the TAAS Exams, Structure and Strategies; Part II: Math Review The Basics, Exponents, Ratios, Probabilities, and More; Geometry, Analyzing Data; Part III: The Princeton Review Practice Tests.
