

The International Conference on Mathematical Sciences and Technology, MathTech, is a biennial conference organised by the School of Mathematical Sciences, USM. This event is open to all national and international experts, practitioners, researchers, and academics to gather and share their knowledge.

The details of fees for participation in the conference are shown in the following table.

Category	Local (RM)	International (USD)
Presenter	990	260
Observer	600	150

Note: 1 USD = RM4.20

Assignment Requirement

Part 1: Create Invoice

Construct a C++ program to do the following tasks:

- Enter the participant's name, category, nationality, accommodation (Yes/No).
- If the answer for the question on accommodation is Yes, the program will ask for the number of days. Then the program will call function `calcAccommodation()` to calculate the accommodation charges.
`calcAccommodation()` receives accommodation (Yes/No), number of days and participation type (local/international) as parameters and return the accommodation charge to the main program. The price per night per person is RM150 for local participant, and USD 100 for international participant.
- Call the `calcFee()` function which receives participant category and type as parameters, calculate the fees, and return it via reference parameter.
- Calculate the total fees and accommodation charges and store the result to variable `totalCharge`.
- Call function `printInvoice()` to print the invoice.

Proceed to Part 2 only if you have completed Part 1.

Part 2: Create Invoice via File Processing

- Modify the program in Part 1 to read in the file provided, `File.txt`.
- Use array structure in your program.
- Print all 5 receipts continuously to `Output.txt`.

centuries ago only a few scholars were capable of understanding his conceptually demanding work Yet this esoteric knowledge quickly became accessible in the nineteenth and early twentieth centuries when Britain produced many leading mathematical physicists In this book Andrew Warwick shows how the education of these masters of theory led them to transform our understanding of everything from the flight of a boomerang to the structure of the universe Warwick focuses on Cambridge University where many of the best physicists trained He begins by tracing the dramatic changes in undergraduate education there since the eighteenth century especially the gradual emergence of the private tutor as the most important teacher of mathematics Next he explores the material culture of mathematics instruction showing how the humble pen and paper so crucial to this study transformed everything from classroom teaching to final examinations Balancing their intense intellectual work with strenuous physical exercise the students themselves known as the Wranglers helped foster the competitive spirit that drove them in the classroom and informed the Victorian ideal of a manly student Finally by investigating several historical cases such as the reception of Albert Einstein's special and general theories of relativity Warwick shows how the production transmission and reception of new knowledge was profoundly shaped by the skills taught to Cambridge undergraduates Drawing on a wealth of new archival evidence and illustrations *Masters of Theory* examines the origins of a cultural tradition within which the complex world of theoretical physics was made commonplace
