Hispanic Serving Institutions (HSIs) in Practice Gina Ann Garcia, 2020-03-01 As the general population of Latinxs in the United States burgeons so does the population of college going Latinx students With more Latinxs entering college the number of Hispanic Serving Institutions HSIs which are not for profit degree granting postsecondary institutions that enroll at least 25% Latinxs also grows with 523 institutions now meeting the enrollment threshold to become HSIs But as they increase in number the question remains What does it mean to serve Latinx students This edited book Hispanic Serving Institutions HSIs in Practice Defining Servingness at HSIs fills an important gap in the literature It features the stories of faculty staff and administrators who are defining servingness in practice at HSIs Servingness is conceptualized as the ability of HSIs to enroll and educate Latinx students through a culturally enhancing approach that centers Latinx ways of knowing and being with the goal of providing transformative experiences that lead to both academic and non academic outcomes In this book practitioners tell their stories of success in defining servingness at HSIs Specifically they provide empirical and practical evidence of the results and outcomes of federally funded HSI grants including those funded by Department of Education Title III and V grants This edited book is ideal for higher education practitioners and scholars searching for best practices for HSIs in the United States Administrators at HSIs including presidents provosts deans and boards of trustees will find the book useful as they seek out ways to effectively serve Latinx and other minoritized students Faculty who teach in higher education graduate programs can use the book to highlight practitioner engaged scholarship Legislators and policy advocates who fight for funding and support for HSIs at the federal level can use the book to inform

and shape a research based Latinx educational policy agenda The book is essential as it provides a framework that simplifies the complex phenomenon known as servingness As HSIs become more significant in the U S higher education landscape books that provide empirically based practical examples of servingness are necessary Formulaire Maths ECT 1re et 2e années Rondy Sylvain, Pierre Berlandi, Claude Huet, Gianfranco Niffoi, Nicolas Pierson, Anne-Sophie Pierson,2015-08-25 Une vision claire des savoirs une mobilisation rapide des connaissances une approche croise e des notions conna tre sont les atouts indispensables la r ussite en pr pas Ce formulaire est la r ponse ces exigences Il consiste en un r sum clair et concis du cours d finitions th or mes propri t s une mise en valeur des formules conna tre un classement th matique des notions indispensables un index tr s pr cis en fin d ouvrage qui permet de retrouver au plus vite la notion cherch e Con u pour apprhender le programme des deux ann es en un clin d oeil ce formulaire est le compagnon id al pour la pr paration des colles la r solution des exercices et des probl mes mais surtout pour accompagner les r visions avant les concours Il compl te intelligemment les ouvrages ECT1 et ECT2 de la collection Pr pas sciences qui permet une acquisition solide des connaissances Mathematics and Transition to School Bob Perry,Amy MacDonald,Ann Gervasoni,2015-01-09 This edited book brings together for the first time an international collection of work focused on two important aspects of any young child s life learning mathematics and starting primary or elementary school The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child s life the opportunities provided by transition to school for young children s mathematics learning the importance of partnerships among adults and among adults and children for effective school transitions and mathematics learning and teaching the critical impact of expectations on their mathematics learning as children start school the importance of providing children with meaningful challenging and relevant mathematical experiences throughout transition to school the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers the importance for the aspirations of children families communities educators and educational organisations to be recognised as legitimate and key determinants of actions experiences and successes in both transition to school and mathematics learning and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school In each chapter authors reflect on their work in the area of mathematics and transition to school place that work within the overall context of research in these fields predict the trajectory of this work in the future and consider the implications of the work both theoretically and practically **Catalog of Copyright Entries. John Benedicto Krejsler,Lejlf Moos,2021-03-23 This book offers an original contribution to the area of international research on comparative education policies and the influence of transnational agencies on national school policy and reform With a focus on grasping what the

Nordic model or the Nordic dimension means in school and educational policy the book explores in depth the school policy contexts of the five Nordic countries Denmark Finland Iceland Norway and Sweden It demonstrates how these particular national contexts engage with and contextualize transnational collaboration on issues like school reform accountability evidence and what works and digitalization The book situates these policy issues over a long period of time while integrating the latest developments and reforms It demonstrates how context matters It shows how the often elusive but pervasive Nordic dimension can only be fully understood by painstaking scrutiny of the five national contexts their particular trajectories and mutual interactions in formal and informal education
