Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

The Shifting Global World of Youth and Education Mabel Ann Brown, 2017-08-15. *The Shifting Global World of Youth and Education* explores how increasing migration and population changes are having an unprecedented impact on global education. Given that the number of children of migrant background is growing internationally, there is a need for increasing awareness of the educational attainment and cultural integration of this population group. This book presents international perspectives on migration and youth and analyses what kinds of effects such demographic changes are having on educational systems around the world. The chapters in this volume provide a fascinating insight into how countries around the world are dealing with loss or growth in their young population as well as changes to their education systems. Written by specialist academics from the relevant country, the book covers Cuba, Lithuania, the United Kingdom, the United States, Finland, Greece, Germany, Austria, Hungary, Latvia, China, Australia, India, Italy, and Poland. Taking into consideration the countries' social and political context, the chapters discuss educational issues surrounding curriculum, assessment, and the opportunities available for the support of young people. Conclusions are drawn about what could be done in the future for the benefit of both the migrant and the existing populations. *The Shifting Global World of Youth and Education* will be of great interest to academics, researchers, and postgraduate students in the disciplines of education, sociology, political sciences, and social work. The book will also give secondary teachers, teaching assistants, social workers, and youth workers the opportunity to reflect on their role within a national and international context.
