Inspiring Ideas to Support Early Maths and Literacy Janet Rees, 2016-02-05 Inspiring Ideas to Support Early Maths and Literacy takes a play based approach and draws on popular stories and rhymes to cover the key areas of mathematics and literacy Full of practical tried and tested ideas for developing understanding in mathematics and literacy this book aims to help practitioners make these areas of learning exciting and meaningful for young children Each chapter shows how learning can be reinforced and brought to life through resources made from everyday materials providing children with an enjoyable and positive learning experience Key features include clear instructions and full colour photographs on how to make practical resources for indoor and outdoor environments vocabulary lists for inspiration and ideas for developing a new play space or overhauling an existing space key questions to consider when planning and designing an indoor or outdoor play space links to the Early Years Foundation Stage that will guide the development of a future playground and challenge providers to enhance their practice This practical resource will be essential reading for primary teachers early years practitioners students and all those interested in developing young children s confidence in mathematics and literacy Multiple Literacy and Science Education: ICTs in Formal and Informal Learning Environments Rodrigues, Susan, 2009-12-31 This book explores various learning mediums and their consequences within a classroom context to synchronize understanding within the schooling fields Provided by publisher **Resources in Education** ,2001 **The Armed Forces Covenant in action?** Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for

future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Psychological Studies in the Teaching, Learning and Assessment of Mathematics Yiming Cao,Zsolt Lavicza ,Shuhua An,Lianchun Dong,2024-05-31

Second International Handbook of Mathematics Education Alan Bishop,M.A. (Ken) Clements,Christine Keitel-Kreidt,Jeremy Kilpatrick,Frederick Koon-Shing Leung,2012-02-02

ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals
