Maths Murder Mystery:

Murder, Mystery and Maths Kevin Lees, 1998 **More Mini Mathematical Murder Mysteries** Jill

Whieldon, 2012-10 We all like to think we can solve a murder given the right clues Here's another chance to use mathematics skills to identify whodunnit following the great success of the first book in the series Mini Mathematical Murder Mysteries The students are given the data or a diagram to solve a problem which is always which of four characters is a murderer To find out the student must solve all or most of the questions on the sheet to identify wrong answers as well as correct ones Problems are staged so there is an element of suspense for the individual and racing between students to solve the mystery

12-14 years [Junior Mini Mathematical Murder Mysteries](#) Jill Whieldon, 1901 *Murderous Maths: The Most Epic Book of Maths EVER* KJartan Poskitt, 2015-10-01 The Most Epic Book of Maths EVER formerly The Murderous Maths of Everything is one big book with nearly all the answers to everything in maths EVER Readers can join the cast of crazy characters on a tour of the Murderous Maths building to discover the darkest and deadliest mathematical secrets including a sure fire way how to make birthdays last twice as long how the number 1 starts fights how triangles lead to murder and much more Maths has never been so much fun **More Mini Mathematical Murder Mysteries** Whieldon Jill (author), 1901 **Mathematics:**

All That Matters Mike Askew, 2015-02-26 Mathematics often gets a bad press Describing someone as calculating or rational is hardly as flattering as being labelled artistic or creative and mathematicians in movies or novels are often portrayed as social misfits who rarely get the guy or girl No wonder some folks say oh I don't care for mathematics I was never any good at it with a wistful sense of pride Yet professional mathematicians talk of the subject differently They look for elegant solutions to problems revel in playing around with mathematical ideas and talk of the creative nature of mathematics As the Russian mathematician Sophia Kovalevskaya said It is impossible to be a mathematician without being a poet in soul So why is there such a gap between the views of everyday folks and professional mathematicians Part of the problem lies in how most of us were taught mathematics in school The mathematics served up there is presented as a series of decontextualised abstract ideas wrested from the human struggles and interactions that gave birth to the ideas Through looking at some of the history of mathematics psychological studies into how we come to know mathematics and key ideas in mathematics itself the intent of this book is if not to make the reader fall in love with mathematics then at least to come to understand its nature a little better and perhaps care a little more for it In short this book explores the human side of maths **MAT 12 Years**
