Measurements And Their Uncertainty:

Measurements and their Uncertainties Ifan Hughes, Thomas Hase, 2010-07-02 This hands on guide is primarily intended to be used in undergraduate laboratories in the physical sciences and engineering It assumes no prior knowledge of statistics It introduces the necessary concepts where needed with key points illustrated with worked examples and graphic illustrations In contrast to traditional mathematical treatments it uses a combination of spreadsheet and calculus based approaches suitable as a quick and easy on the spot reference The emphasis throughout is on practical strategies to be adopted in the laboratory Error analysis is introduced at a level accessible to school leavers and carried through to research level Error calculation and propagation is presented through a series of rules of thumb look up tables and approaches amenable to computer analysis The general approach uses the chi square statistic extensively Particular attention is given to hypothesis testing and extraction of parameters and their uncertainties by fitting mathematical models to experimental data Routines implemented by most contemporary data analysis packages are analysed and explained The book finishes with a discussion of advanced fitting strategies and an introduction to Bayesian analysis

Measurements and Their Uncertainties Ifan Hughes, Thomas Hase, 2010-07 This short guide to modern error analysis is primarily intended to be used in undergraduate laboratories in the physical sciences No prior knowledge of statistics is assumed The necessary concepts are introduced where needed and illustrated graphically The book emphasises the use of computers for error calculations and data fitting

Visualising Skyscapes Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere that great dome of the sky which governs light and darkness critical to life itself yet its influence is often neglected in the archaeological narrative Visualising Skyscapes captures a growing interest in the emerging field of skyscape archaeology This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam its contents have a wide reaching relevance for the fields of archaeology anthropology ethnography archaeoastronomy astronomy heritage and cultural studies The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world Visualising Skyscapes captures the growing interest in the multidisciplinary study of skylines and will be of interest to academics students and the general public as well as having international appeal It is topical timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images
