Plants Frederic Remsen Hutton, 2015-06-12 Excerpt from *The Mechanical Engineering of Power Plants* This book has been undertaken with two distinct objects in view and according to a principle suggested by these objects The first and primary intention is to provide a book to serve as a text book in class room work in a University which makes the education of engineers a part of its duty This object has given the book its form and has determined its arrangement It must have been observed by every instructor that the most enthusiastic class of students who follow engineering in the schools are those who have had a previous experience in the shop or in the power house which has made them familiar with the conditions which there prevail and has brought to their attention questions for which they have sought to find answers It is the wish of its projector that so far as that condition can be met by any book whatever this book should put all students of engineering somewhat upon the footing of these fortunate persons It must therefore present the machinery and appliances of the power house before the reader's mind from the practical or experimental side and make him familiar with the power plant in its various forms and seek to familiarize him with the solutions which experience and good judgment have proposed for problems of this sort It is believed that with this knowledge and with the training in the weighing of advantages and disadvantages which attach to any given solution the student is most satisfactorily fitted to take up as a later feature of his engineering study those principles of mechanics physics and thermodynamics upon which all successful practice must ultimately rest About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged
