How Australia Decides Sally Young, 2011-02-14 In recent years the Australian media have come under fire for their reporting of politics and election campaigns Political reporting is said to be too influenced by commercial concerns too obsessed with gossip and scandal and too focused on trivia and sound bites at the expense of serious issues There are accusations of bias sensationalism lazy journalism and horse race reporting that is obsessed with opinion polls How Australia Decides is the first book to put these allegations to the test Based on a four year empirical study Sally Young reports the results of the only systematic historical and in depth analysis of Australian election reporting This groundbreaking book shows how election reporting has changed over time and how political news audiences news production and shifts in political campaigning are influencing media content with profound implications for Australian democracy

*Missing Persons in Australia* Marianne James, Jessica Anderson, 2008-03 Investigating missing persons cases is a complex field There is no single service responsible for the investigation or the provision of support to those who are found or to the family and friends of missing persons Police services across Australia play a crucial role in responding to reports of missing people complemented by non government search agencies such as The Salvation Army and the Australian Red Cross

Since national research on missing persons was conducted ten years ago there have been a range of initiatives to improve the response to reports of missing people particularly in the promotion of a national approach. However, police data suggest there may be more people going missing than ever before but until there are better data this cannot be clarified with any confidence. Similarly, risk factors amongst different groups of missing persons cannot be properly identified. The potential role of the non-government sector to assist searches and prevent people from going missing seems unfulfilled largely due to poor levels of awareness and lack of resources. This paper summarises key findings from a recent national project that builds on the earlier work by updating information on recorded incidents and by focusing on current responses and potential preventive measures. The specific objectives of the research project were to update existing data on missing persons from all Australian state and territory sources with a view to identifying at risk groups, identify good practice in relation to preventative measures, early intervention, support services and referral mechanisms, develop a more networked approach to policy and practice and identify and establish a solid base for future research. The paper identifies key priorities for further development to improve practices related to reducing the incidence of missing persons and the provision of services.

The Routledge International Handbook of Homicide Investigation Cheryl Allsop, Sophie Pike, 2023-12-22. The Routledge International Handbook of Homicide Investigation will be the first of its kind to bring together research and personal insights from detectives, practitioners, academics and experts internationally on various complexities that are involved in the investigation of homicides. The handbook discusses the challenges faced by homicide detectives especially since not every investigation will demand the same approach. The tools, techniques and expertise required also vary according to the type of homicide that is investigated. This handbook brings these issues and opportunities to the forefront while also illustrating the wider complexities and emotional impact of homicide investigations on detectives and those bereaved by homicide. The book is divided into four parts. Part I provides chapters that explore homicide investigation across the globe. Parts II and III offer an up to date insight into the ever evolving tools and techniques that are used during a homicide investigation and explore how specific types of homicides are investigated. Part IV considers both those directly affected by the homicide and the role of indirect victims in the investigation including the impact of homicide and its investigation. Chapters also consider some recent developments in homicide investigation that may shape its future as well as current issues that are facing homicide detectives. Providing cutting edge research on every step of the criminal homicide investigation process, this handbook is essential reading for scholars, students and practitioners interested in homicide investigation.

**Lost from View** Nina Biehal, Fiona Mitchell, Jim Wade, 2003. Thousands of people are reported missing each year yet very little is known about who they are, why they disappear and what happens to them. Although the predicament of runaways and other missing children has a higher profile, the issue of missing adults has been neglected in research and policy. Drawing on almost 2000 missing persons cases, the report explores who goes missing, why people choose to go missing and how people can

become missing in other circumstances vbTab the experiences of missing people while they are away and the risks that they may encounter vbTab how missing episodes are resolved vbTab how further developments in policy and practice may assist missing people and their families This highly topical report demonstrates that the social problems underpinning the missing issue cut across many areas of social policy This book will therefore be essential reading for policy makers practitioners and academics in the fields of criminal justice child and family welfare health and social work      **Customary International**

**Humanitarian Law** Jean-Marie Henckaerts, Louise Doswald-Beck, 2005 In 1996 the International Committee of the Red Cross alongside a range of renowned experts embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area This book is the result of that study a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts Given that important treaties in this area have not yet been universally ratified this is a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts      Mobile Technology and the Transformation of Public Alert and Warning Hamilton Bean, 2019-10-01 This timely book provides the inside story of the development of mobile public alert and warning technology in the United States and addresses similar systems being used in Australia Canada Japan and the Netherlands This book provides a comprehensive account of how mobile smartphone systems are transforming the practice of public alert and warning in the United States Recent events have vaulted mobile alert and warning technology to the forefront of public debates concerning the hazards of the digital age False alarms of ballistic missile attacks on Hawaii and Japan the non use of mobile alerts during the Northern California wildfires and the role this technology plays in supporting police manhunts and counterterrorism efforts have prompted reconsideration of how these systems are used Drawing upon interviews with officials executives experts and citizens the book provides an in depth analysis of the events and contexts influencing the trajectory of mobile public alert and warning and charts a course for its improvement The book first introduces readers to the high stakes involved in the transformation of public alert and warning explaining how new research is revealing the benefits limitations and risks of mobile technology in the disaster communication context Three case studies then illustrate issues of risk trust and appropriateness in mobile public alert and warning
