

## Finding Nemo Viewing Guide

### *Some of the Animals Who Appear in the Movie*

Clownfish -- Nemo and Marlin belong to one of about 27 species of clownfish (*Amphiprion ocellaris*). Clownfish are small and often brightly colored. They belong to the damselfish family. They are 2 - 5 inches (5 - 12.5 cm) long. They live in tropical waters.

Clownfish are often sheltered by an anemone with whom they have a symbiotic relationship. In fact, most of the scientific literature refers to them as "anemone fish." Clownfish are not immune to the poison in the anemone's tentacles and at first appear to be stung by them. Scientists believe that by dancing up against the tentacles for a

time clownfish develop a protective mucous covering. Clownfish eat leftovers from fish consumed by the anemone as well as planktonic crustaceans and algae. Clownfish also eat the dead tentacles of their host anemone. Eggs are laid in large batches, usually near and sometimes within the host anemone. Clownfish are not eaten by man but their bright colors make them popular for saltwater aquariums. Divers

have damaged many reefs looking for prime specimens. Clownfish live in the tropical parts of the Pacific and Indian Oceans or where warm, tropical waters are carried by currents, such as the east coast of Japan.

Pacific Blue Tang -- Dorey's real life models (*Paracanthurus hepatus*) are members of the surgeonfish family. They were given this name because sharp, moveable spines on both sides of their tails were thought to resemble surgeons' scalpels. These spines are for defense. A fisherman trying to hold a blue tang can suffer a deep and painful wound if the fish tries to escape by giving a twist of its tail. The fish are blue with a yellow tail and a black stripe along the upper portion of their body. They live on zooplankton and can grow to be about 12

## **Finding Nemo Biology Viewing Guide Answers:**

**A Short Guide to Writing about Biology** Jan A. Pechenik, 2024-11-20 For almost four decades *A Short Guide to Writing About Biology* has been an indispensable resource. Noted biologist Jan Pechenik guides readers in acquiring the skills necessary to become critical thinkers and accomplished writers. Biology is a way of thinking about the world; it is also about communicating information accurately, logically, clearly, honestly, and concisely. The tenth edition outlines all aspects of writing well while also providing readers with procedures for developing strong research questions, logically explaining findings, and supporting claims with evidence. All good writing involves both a struggle for understanding and a struggle to express that understanding. The author delivers sage advice in an accessible, entertaining style to help readers learn to write compelling papers and to enhance their understanding.

**Bank PO Solved Papers Reasoning 2020** Arihant Experts, 2020-02-14 IBPS is one of the major bodies of the Banking Sector which is responsible for its fair and transparent selection of candidates into its participating banks through multiple online-based tests. It has recently released its employment notification for the post of Probationary Officers (PO) and Management Trainees (MT) which will occur in three stages: Prelims and Mains followed by a Common Interview. The current edition of 20 Years (2009-2000) Chapterwise Solved Papers Bank PO Reasoning has been carefully revised for the candidates who are preparing for the banking exams like IBPS PO, SBI PO, Nationalised Bank PO, and more. This practice book provides the ample amount of solved papers arranged in 20 Chapters with more than 5000 Objective questions for the conceptual clarity. Each chapter is incorporated with highly useful study material and gives detailed explanations of all questions. It also includes Practice Sets and 3 Solved Papers that help to solidify the practice and track level progress and help them to know the stronger and weaker areas of the aspirants. Bringing complete study resources for various Bank PO exams at one place for the convenience of aspirants, this book is also useful for RBI Grade I, RRB Scale I, Insurance Sector, and other exams.

**TABLE OF CONTENTS**

**Fishes** Gene Helfman, Bruce Collette, 2011-11-03 One fish, two fish, red fish, nearly thirty thousand species of fish or fishes as they are properly called when speaking of multiple species. This is but one of many things the authors of this fascinatingly informative book reveal in answering common and not so common questions about this ubiquitous group of animals. Fishes range in size from tiny gobies to the massive Ocean Sunfish which weighs thousands of pounds. They live in just about every body of water on the planet. Ichthyologists Gene Helfman and Bruce Collette provide accurate, entertaining, and sometimes surprising answers to over 100 questions about these water dwellers such as: How many kinds of fishes are there? Can fishes breathe air? How smart are fishes? Do fishes feel pain? They explain how bony fishes evolved, the relationship between them and sharks.

and why there is so much color variation among species Along the way we also learn about the Devils Hole Pupfish which has the smallest range of any vertebrate in the world Lota lota the only freshwater fish to spawn under ice the Candiru a pencil thin Amazonian catfish that lodges itself in a very personal place of male bathers and must be removed surgically and many other curiosities With over 100 photographs including two full color photo galleries and the most up to date facts on the world s fishes from two premier experts this fun book is the perfect bait for any curious naturalist angler or aquarist
