displacement of local gods and myths with those of the Dharma as was the case with Christianity and Islam but also involved fundamentally transforming earlier social and political structures and networks of economic exchange The Buddha s Footprint argues that the institutionalization of the Dharma was intimately connected to agricultural expansion resource extraction deforestation urbanization and the monumentalization of Buddhism itself **Remote Sensing for Natural Resources Management & Monitoring** Mahesh Gaur,C.B. Pandey,R.K. Goyal,2016-10-01 The book attempts to match user need to the level of technology required for management planning and monitoring of natural resources It provides clear guidance on the reliability accuracy and cost of applications Editors believe that this endeavour shall provide a valuable scientific basis to students and researchers to address the future challenges in natural resources monitoring and management Accurate inventory assessment and periodic monitoring of resources will enable the policy makers to keep an eye on optimal utilization of resources and development process to take timely interventions We further hope this book will be a valuable reference and provide practical guidance for all who work towards the goal of the sustainable and judicious use of resources *IGARSS 2003* ,2003
