ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Dr Martin Rich, Dr Anne Brown, 2014-06-16 **The Notion of Employer in the Era of the Fissured Workplace** Roger Blanpain, Frank Hendrickx, 2017-01-15 The word fissured aptly describes the effect on the workplace of the enormous retreat from direct employment on the part of large enterprises that began several decades ago and shows no sign of slowing down. Market leading companies even though they continue to wield considerable influence on the fate of actual workers may thus be relieved of legal responsibility as employers. How extensive is this phenomenon? Do recourses exist in labour law? What ongoing trends can be discerned? This groundbreaking book tackles these questions and more with thoroughly researched reports from ten of the world's leading market driven economies: Australia, China, France, Germany, Japan, the Republic of Korea, Spain, Taiwan, the United Kingdom and the United States. Recognizing that law should squarely grasp and tackle this new reality, the authors consider such questions as the following: How far can current labour law go in determining the responsibility of persons who have no direct contractual relationship with the workers? Do other measures such as soft law or reputation mechanisms in the market deal with the undesirable consequences of the fissurization more properly? What managerial motives and socioeconomic backgrounds give rise to such fissurization? What distinct phenomena compose fissuring? Are measures available to protect workers that go beyond the boundary of the legal entity, e.g. initiatives toward piercing the corporate veil? Each contributor describes for his or her country how far the fragmentation and externalization of employment has gone: current legislation protecting workers in a multilayered contractual relationship or indirect employment relationship, e.g. on health and safety, wages, bargaining, dismissal and emerging developments and trends. This book ably responds to the question posed by a recent study: Why has work become so bad for so many and what can be done to improve it? Although concerned scholars worldwide will rally to the call, the reports in this volume will also be of great practical value to business persons and labour and employment lawyers everywhere. Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple

approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other. Thus, this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities. The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS, DDM, and CDC. This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another, what learning conditions result in transferable knowledge and skills, and how these features can be trained.
