Smallman-Raynor,Andrew D. Cliff,J. Keith Ord,Peter Haggett,2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and

where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases

An Urban Geography of the Roman World, 100 BC to AD 300 J. W. Hanson, 2016-11-07 This book provides a new account of the urbanism of the Roman world between 100 BC and AD 300 To do so it draws on a combination of textual sources and archaeological material to provide a new catalogue of cities calculates new estimates of their areas and uses a range of population densities to estimate their populations

Elastic Empire Lisa Bhungalia, 2023-12-12 The United States integrated counterterrorism mandates into its aid flows in the West Bank and Gaza Strip during the early years of the global war on terror Some two decades later this securitized model of aid has become normalized across donor intervention in Palestine Elastic Empire traces how foreign aid on which much of the Palestinian population is dependent has multiplied the sites and means through which Palestinian life is regulated surveilled and policed this book tells the story of how aid has also become war Drawing on extensive research conducted in Palestine Elastic Empire offers a novel accounting of the US security state The US war chronicled here is not one of tanks grenades and guns but a quieter one waged through the interlacing of aid and law It emerges in the infrastructures of daily life in a greenhouse and library in the collection of personal information and mapping of land plots in the halls of municipal councils and in local elections and indelibly transfigures lives Situated in a landscape where the lines between humanitarianism and the global war on terror are increasingly blurred Elastic Empire reveals the shape shifting nature of contemporary imperial formations their realignments and reformulations their haunted sites and their obscured but intimate forms

Canada's Waste Flows Myra J. Hird, 2021-02-15 From shipments of Canadian waste rotting in developing countries to overflowing landfills and ineffective recycling programs Canada is facing a waste crisis Canadians are becoming

increasingly aware that waste is an acute environmental and human health issue and a complex one the solutions to which are often contradictory Canada's Waste Flows is an honest look at the production and movement of Canadian waste from region to region and across the globe and its consequences Through a series of timely empirical case studies the book reveals waste as less of a technological problem and more of a material economic political historical and cultural concern Canada's Waste Flows demonstrates that Canadians are misdirecting their attention to post consumer waste and their responsibility for minimizing it through recycling waste must be understood as a social justice issue and in particular as a symptom of ongoing settler colonialism Through a comparative study of waste management in southern and northern Canadian communities Myra Hird argues that we will only resolve our waste crisis through democratic engagement A critical and compelling book that will generate conversation and incite change Canada's Waste Flows uncovers how Canada's role as a global leader in waste production and export is key to changing Canada's waste future [Asia Bond Monitor November 2019](#) Asian Development Bank, 2019-11-01 The quarterly Asia Bond Monitor reviews developments in emerging East Asian local currency bond markets The report discusses key trends in the region's bond markets and the outlook risks and policy options It covers the 10 members of the Association of Southeast Asian Nations and the People's Republic of China Hong Kong China and the Republic of Korea *'Is It Global War on Terrorism' or Global War over Terra Africana?* Nkwazi Nkuzi Mhango, 2017-12-06 Global War on Terrorism or Global War over Terra Africana How Imperial Powers Seek to Occupy Africa Militarily is a long onerous academic voyage of the demystification and demythologization of the Global War on Terror former US president George W Bush and former UK premier Tony Blair conceived envisaged and declared for their hidden personal and national interests It is a hidden and untold story of the other side about the GWOT which is but the GWOTA Major arguments presented gyrate around the deconstruction and overhaul of the GWOT so that it can be equally formulated and fought by all nations for the interests of all but not the interests of some as it currently is Also the book repudiates the pontification the pontifices maximus of the GWOTA have always made ex nihilo while concealing their drive's for perpetually exploiting poor countries Terrorism is a world phenomenon everybody must fight provided it is collectively agreed decided and declared for the collective good and interests of the world but not the interests of a few hegemonic countries that usurped the power of declaring who is a terrorist and who is not Although terrorism is real the manner it is fought is a little bit knotty This tome acts as an eye opener and a wake up call for Africa to start interrogating and excavating the hidden truths about the GWOT chiefly the way it was enacted declared presented and now fought with essentialist and controversialist modus operandi and rationale Other major questions asked and answered are Why exporting military and military hardware guised as fighting terrorism without underscoring the terror military incursion will inter alia cause to Africa especially If truly the aim of the GWOT is to wage war on terror why doesn't the West want to empower African armies Why did the US appoint itself to lead the war conceived and declared without meeting the requirements of the just war or

Its Place David B. Audretsch, 2015-03-02 Every city region and state wants to do better or at the very least not do worse. Places have a strong and vigorous concern with and stake in generating a stronger economic performance. This concern spans a broad spectrum of constituents and interests including business, labor, non-profit organizations, government, and private residents. However, such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place. While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance, the field of strategic management in business schools, no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place. Everything in *Its Place* seeks to fill this intellectual void, explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places. Several academic fields have generated a number of important theories, empirical findings, and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance. Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers, these insights are integrated together into a coherent, inclusive framework to guide and inform thought leaders and scholars in the strategic management of places.

The conference aimed to provide a platform for researchers, engineers, and academics.

Navigating the Changing Landscape of Formal and Informal Science Learning Opportunities Deborah Corrigan, Cathy Bunting, Alister Jones, John Loughran, 2018-06-27 This book presents research involving learning opportunities that are afforded to learners of science when the focus is on linking the formal and informal science education sectors. It uses the metaphor of a landscape as it emphasises how the authors see the possible movement within a landscape that is inclusive of formal, informal, and free choice opportunities. The book explores opportunities to change formal school science education via perspectives and achievements from the informal and free choice science education sector within the wider lifelong, life-wide education landscape. Additionally, it explores how science learning that occurs in a more inclusive landscape can demonstrate the potential power of these opportunities to address issues of relevance and engagement that currently plague the learning of science in school settings. Combining specific contexts, case studies, and more general examples, the book examines the science learning landscapes by means of the lens of an ecosystem and the case of the Synergies longitudinal research project. It explores the relationships between school and museum and relates the lessons learned through encounters with a narwhal.
