Geography Memorandum Caps 2014:

Wilted Julie Guthman, 2019-08-20 Strawberries are big business in California They are the sixth highest grossing crop in the state which produces 88 percent of the nation's favorite berry Yet the industry is often criticized for its backbreaking labor conditions and dependence on highly toxic soil fumigants used to control fungal pathogens and other soilborne pests In Wilted Julie Guthman tells the story of how the strawberry industry came to rely on soil fumigants and how that reliance reverberated throughout the rest of the fruit's production system The particular conditions of plants soils chemicals climate and laboring bodies that once made strawberry production so lucrative in the Golden State have now changed and become a set of related threats that jeopardize the future of the industry *Yearbook of International Organizations 2013-2014*

Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the

prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies *The Photographer and the President* Richard Lowry, 2015-05-26 A new angle on Lincoln and his legacy exploring the rich and suggestive dialogue between art image and politics at the time of the Civil War Abraham Lincoln was one of the most photographed figures of his century Richard Lowry explores Lincoln's association with Alexander Gardner the man who would create the most memorable and ultimately iconic images of the president both in his studio and on the battlefields of the Civil War Lowry's book is an accessible and lively narrative of this symbiotic relationship and an examination of the emerging role of the media at a moment of national transformation Lincoln was an early adopter of photographic technology and visionary in how he used it as FDR was with radio JFK with television and Obama with the internet By highlighting this very modern aspect of such a storied presidency Lowry opens a new door on Lincoln's relationship to politics and celebrity just as the mass culture of the image was taking root in America *Land Fictions* D. Asher Ghertner, Robert W. Lake, 2021-03-15 *Land Fictions* explores the common storylines narratives and tales of social betterment that justify and enact land as commodity It interrogates global patterns of property formation the dispossessions property markets enact and the popular movements to halt the growing waves of evictions and land grabs This collection brings together original research on urban rural and peri urban India rapidly urbanizing China and Southeast Asia resource expropriation in Africa and Latin America and the neoliberal urban landscapes of North America and Europe Through a variety of perspectives *Land Fictions* finds resonances between local stories of land's fictional powers and global visions of landed property's imagined power to automatically create value and advance national development Editors D Asher Ghertner and Robert W Lake unpack the dynamics of land commodification across a broad range of political spatial and temporal settings exposing its simultaneously contingent and collective nature The essays advance understanding of the politics of land while also contributing to current debates on the intersections of local and global urban and rural and general and particular Contributors Erik Harms Michael Watts Sai Balakrishnan Brett Christophers David Ferring Sarah Knuth Meghan Morris Benjamin Teresa Mi Shih Michael Levien Michael L Dwyer Heather Whiteside **How to Disappear** Akiko Busch, 2020-02-11 It is time to reevaluate the merits of the inconspicuous life to search out some antidote to continuous exposure and to reconsider the value of going unseen undetected or overlooked in this new world Might invisibility be regarded not simply as refuge but as a condition with its own meaning and power The impulse to escape notice is not about complacent isolation or senseless conformity but about maintaining identity autonomy and voice In our networked and image saturated lives the notion of disappearing has never been more alluring Today we are relentlessly encouraged even conditioned to reveal share and promote ourselves The pressure to be public comes not just from our peers but from vast and pervasive technology companies that want to profit

from patterns in our behavior A lifelong student and observer of the natural world Busch sets out to explore her own uneasiness with this arrangement and what she senses is a widespread desire for a less scrutinized way of life for invisibility Writing in rich painterly detail about her own life her family and some of the world s most exotic and remote places she savors the pleasures of being unseen Discovering and dramatizing a wonderful range of ways of disappearing from virtual reality goggles that trick the wearer into believing her body has disappeared to the way Virginia Woolf s Mrs Dalloway finds a sense of affiliation with the world around her as she ages Busch deliberates on subjects new and old with equal sensitivity and incisiveness How to Disappear is a unique and exhilarating accomplishment overturning the dangerous modern assumption that somehow fame and visibility equate to success and happiness Busch presents a field guide to invisibility reacquainting us with the merits of remaining inconspicuous and finding genuine alternatives to a life of perpetual exposure Accessing timeless truths in order to speak to our most urgent contemporary problems she inspires us to develop a deeper appreciation for personal privacy in a vast and intrusive world

The Social Order of Collective Action Matthew Kearney,2018-11-05 The Wisconsin Uprising of 2011 was one of the largest sustained collective actions in the history of the United States Newly elected Governor Scott Walker introduced a shock proposal that threatened the existence of public unions and access to basic health care then insisted on rapid passage The protests that erupted were neither planned nor coordinated The largest in Madison consolidated literally overnight into a horizontally organized leaderless and leaderful community That community featured a high level of internal social order complete with distribution of food and basic medical care group assemblies for collective decision making written rules and crowd marshaling to enforce them and a moral community that made a profound emotional impact on its members The resistance created a functioning commune inside the Wisconsin State Capitol Building In contrast to what many social movement theories would predict this round the clock protest grew to enormous size and lasted for weeks without direction from formal organizations This book written by a protest insider argues based on immersive ethnographic observation and extensive interviewing that the movement had minimal direction from organizations or structure from political processes Instead it emerged interactively from collective effervescence improvised non hierarchical mechanisms of communication and an escalating obligation for like minded people to join and maintain their participation Overall the findings demonstrate that a large and complex collective action can occur without direction from formal organizations

Security. Cooperation. Governance. Christian Leuprecht,Todd Hataley,2023-10-25 Historically national borders have evolved in ways that serve the interests of central states in security and the regulation of trade This volume explores Canada US border and security policies that have evolved from successive trade agreements since the 1950s

punctuated by new and emerging challenges to security in the twenty first century The sectoral and geographical diversity of cross border interdependence of what remains the world s largest bilateral trade relationship makes the Canada US border a living laboratory for studying the interaction of trade security and other border policies that challenge traditional centralized approaches to national security The book s findings show that border governance straddles multiple regional sectoral and security scales in ways rarely documented in such detail These developments have precipitated an Open Border Paradox extensive regionally varied flows of trade and people have resulted in a series of nested but interdependent security regimes that function on different scales and vary across economic and policy sectors These realities have given rise to regional and sectoral specialization in related security regimes For instance just in time automotive production in the Great Lakes region varies considerably from the governance of maritime and intermodal trade and port systems on the Atlantic and Pacific coasts which in turn is quite different from commodity based systems that manage diverse agricultural and food trade in the Canadian Prairies and US Great Plains The paradox of open borders and their legitimacy is a function of robust bilateral and multilevel governance based on effective partnerships with substate governments and the private sector Effective policy accounts for regional variation in integrated binational security and trade imperatives At the same time binational and continental policies are embedded in each country s trade and security relationships beyond North America **A Balancing**

Introduction to Coastal Processes and Geomorphology Robin Davidson-Arnott,Bernard Bauer,Chris Houser,2019-09-19 Grounded in current research this second edition has been thoroughly updated featuring new topics global examples and online material Written for students studying coastal geomorphology this is the complete guide to the processes at work on our coastlines and the features we see in coastal systems across the world An Introduction to Place-Based Development

Economics and Policy Gilberto Seravalli,2015-02-11 This book introduces the reader to local development economics and policy with a special focus on the place based paradigm that covers its justification its difficulties and the types of public intervention that it suggests The starting point for the analysis is that economic development in lagging places is not to be expected as the result of a mechanism of automatic convergence between backward and advanced regions and that therefore the most appropriate development policy is not to maximize competition among all agents in all sectors and places The failure of the Washington Consensus is examined and the two competing positions to have emerged from this failure spatially blind interventions and place based policies are contrasted The main shortcoming of spatially blind policies namely that immobile resources that could trigger or support a development process often remain untapped or trapped is emphasized The limitations of the big push state intervention and wage flexibility solutions to this trap are analyzed and the merits of

place based policies that support intervention and can deal with uncertainty risk and conflict are discussed *Power Lines* Andrew Needham, 2014-10-26 How high energy consumption transformed postwar Phoenix and deepened inequalities in the American Southwest In 1940 Phoenix was a small agricultural city of sixty five thousand and the Navajo Reservation was an open landscape of scattered shepherders Forty years later Phoenix had blossomed into a metropolis of 1.5 million people and the territory of the Navajo Nation was home to two of the largest strip mines in the world Five coal burning power plants surrounded the reservation generating electricity for export to Phoenix Los Angeles and other cities Exploring the postwar developments of these two very different landscapes *Power Lines* tells the story of the far reaching environmental and social inequalities of metropolitan growth and the roots of the contemporary coal fueled climate change crisis Andrew Needham explains how inexpensive electricity became a requirement for modern life in Phoenix driving assembly lines and cooling the oppressive heat Navajo officials initially hoped energy development would improve their lands too but as ash piles marked their landscape air pollution filled the skies and almost half of Navajo households remained without electricity many Navajos came to view power lines as a sign of their subordination in the Southwest Drawing together urban environmental and American Indian history Needham demonstrates how power lines created unequal connections between distant landscapes and how environmental changes associated with suburbanization reached far beyond the metropolitan frontier Needham also offers a new account of postwar inequality arguing that residents of the metropolitan periphery suffered similar patterns of marginalization as those faced in America's inner cities Telling how coal from Indian lands became the fuel of modernity in the Southwest *Power Lines* explores the dramatic effects that this energy system has had on the people and environment of the region

Brown,2020-06-05 Since ancient times music has demonstrated the incomparable ability to touch and resonate with the human spirit as a tool for communication emotional expression and as a medium of cultural identity During World War II Nazi leadership recognized the power of music and chose to harness it with malevolence using its power to push their own agenda and systematically stripping it away from the Jewish people and other populations they sought to disempower But music also emerged as a counterpoint to this hate withstanding Nazi attempts to exploit or silence it Artistic expression triumphed under oppressive regimes elsewhere as well including the horrific siege of Leningrad and in Japanese internment camps in the Pacific The oppressed stubbornly clung to music wherever and however they could to preserve their culture to uplift the human spirit and to triumph over oppression even amid incredible tragedy and suffering This volume draws together the musical connections and individual stories from this tragic time through scholarly literature diaries letters memoirs compositions and art pieces Collectively they bear witness to the power of music and offer a reminder to humanity of the imperative each faces to not only remember but to prevent another such cataclysm *Routledge Handbook of Contemporary Taiwan* Gunter Schubert,2016-05-20 The Routledge Handbook of Contemporary Taiwan offers a comprehensive overview of both contemporary Taiwan and the Taiwan studies field Each contribution summarises the major findings in the field and highlights long term trends recent observations and possible future developments in Taiwan Written by an international team of experts the chapters included in the volume form an accessible and fascinating insight into contemporary Taiwan Up to date interdisciplinary and academically rigorous the Handbook will be of interest to students academics policymakers and others in search of reliable information on Taiwanese politics economics culture and society
