Geography November 2014 Memo Paper 1:

The World's Search for Sustainable Development Mukul Sanwal, 2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements. The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level. The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings, agreements and consensus within the multilateral system. It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths. The challenges call for a transformation of social systems to facilitate a broadly acceptable change. The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices.

The Geography of Mobility, Wellbeing and Development in China Wenjie Wu, Yiming Wang, 2020-02-25 Big data is increasingly regarded as a new approach for understanding urban informatics and complex systems. Today there is unprecedented data availability with detailed remote sensed data on the built environment and rich mineable web based sources in the form of social media, web mapping information services and other sources of unstructured big data. This book brings together a group of international contributors to consider the geographical implications of mobility, wellbeing and development within and across Chinese cities through location based big data perspectives. The degree of urban sprawl, productive density and vibrancy can be reflected from location based social media big data. The challenge is to identify map and model these relationships to develop cities at different places in the urban hierarchical system that are more sustainable. This edited book aims to tackle these issues through two inter related geographical scales: inter city level and intra city level. The text is designed for graduate courses in planning, geography, public policy and administration and for international researchers who are involved in urban and regional economics and economic geography.

The Shadow of Kenyan Democracy Dominic Burbidge, 2016-03-09 Why has democracy failed to reduce corruption in Kenya? Framing the challenge in game theoretical terms, Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms. Since 1992, Kenya has conducted multiparty elections with the hope of promoting accountability and transparency in government. This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism. Providing a nuanced assessment of democracy's difficult road in Kenya, Burbidge discusses the independent role being played by widespread social expectations of corruption. Through tracking average views of the average person, it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations. This trend is

the shadow of Kenyan democracy and must be treated as a policy challenge on its own terms before institutional reforms will be successful

The Great Divide: Regional Inequality and Fiscal Policy William Gbohoui, W. Raphael Lam, Victor Duarte Lledo, 2019-05-02 Growing regional inequality within countries has raised the perception that some places and people are left behind This has prompted a shift toward inward looking policies and away from pro growth reforms This paper presents novel stylized facts on regional inequality for OECD countries It shows that regional disparity in per capita GDP is large even after adjusting for regional price differences persistent and widening over time The paper also finds that rising nationwide income inequality is associated with both rising within region income inequality and widening average income across regions The rise in inequality is related to declining incentives for interregional labor mobility especially for poor households in lagging regions which are estimated to reduce by as much as one third in the United States Against these facts the paper proposes a framework to identify whether how and by whom fiscal policies can be used to tackle regional inequality It outlines conditions under which those policies should be spatially targeted and illustrates how they can be complementary to conventional means testing methods in mitigating income inequality

Handbook of the Politics of the Arctic Leif Christian Jensen, Geir Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries

Research Handbook on Central Banking Peter Conti-Brown, Rosa Maria Lastra, Central banks occupy a unique space in their national governments and in the global economy The study of central banking however has too often been dominated by an abstract theoretical approach that fails to grasp central banks institutional nuances This comprehensive and insightful Handbook takes a wider angle on central banks and central banking focusing on the institutions of central banking By institutions Peter Conti Brown and Rosa Lastra refer to the laws traditions norms and rules used to structure central bank organisations The Research Handbook on Central Banking s institutional approach is one of the most interdisciplinary efforts to consider its topic and includes chapters from leading and rising central bankers economists lawyers legal scholars political scientists historians and others

Urban Transformations Sigrun Kabisch, Florian Koch, Erik Gawel, Annegret Haase, Sonja Knapp, Kerstin Krellenberg, Jaime Nivala, Andreas Zehnsdorf, 2018-01-08 The book addresses urban transformations towards sustainability in light of challenges of global urbanization processes and the consequences of global environmental change The aim is to show that urban transformations only succeed if both innovative scientific solutions and practice oriented governance approaches are developed This assumption is addressed by providing theoretical insights and empirical evidence pointing particularly at 3 concepts or qualities which are determined here as being central for achieving urban sustainability resource efficiency quality of life and

resilience Urban case studies from several international research projects illustrate our conceptual approach of urban transformations towards sustainable development Thus the book reaches far beyond a mere additive description of single case studies It incorporates the results of condensed synthesis resulting from comparisons and evaluations It provides based on cross cutting reflection of single cases and different scales and methods of analysis general and transferable findings They do not only consider the scientific sphere but deliberately go beyond it discussing transferability of knowledge into practice governance options and the feasibility of policy strategies in order to pave the way for sustainable urban transformations to happen today and in the future

Geography Education Research in the UK: Retrospect and Prospect Graham Butt, 2019-08-22 This book provides a unique assessment of the development of research in geography education and its future prospects offering a challenging critique of subject based education research with particular reference to geography education across a range of different jurisdictions It covers a range of topics including the changing role of research in geography education the relationship between education research and professional practice with special reference to geography education research the place of academic subject knowledge in geography education research critiques of the functions of research in geography education and the key issues for education policy and policymakers concerning educational research at national and international levels Importantly in a period marked by radical change for education research and researchers the book offers a timely appraisal of possible ways forward for geography education research Addressing the needs of academics research students policymakers and education practitioners who undertake use or shape the future of research in geography education it comprehensively explores the forces that have driven the development of geography education research and pedagogy Further by positioning its analysis in the context of education policy debates in the UK and further afield it assesses the role and function of research in education and offers an outlook on its future This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject based research in education

and income distributions **Fifth World Congress on Disaster Management: Volume IV** S. Anand Babu, 2023-04-27

World Congress on Disaster Management WCDM brings researchers policy makers and practitioners from around the world in the same platform to discuss various challenging issues of disaster risk management enhance understanding of risks and advance actions for reducing risks and building resilience to disasters The fifth WCDM deliberates on three critical issues that pose the most serious challenges as well as hold the best possible promise of building resilience to disasters These are Technology Finance and Capacity WCDM has emerged as the largest global conference on disaster management outside the UN system The fifth WCDM was attended by more than 2500 scientists professionals policy makers practitioners all around the world despite the prevalence of pandemic *The Inequality Paradox* Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization that have led to the paradox of rising inequality even as worldwide poverty drops But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth What can societies do to reshape capitalism for the 21st century Drawing on the latest research McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few In accessible and thought provoking prose McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development the fourth industrial revolution that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this From the inquisitive layperson to the professional economist or policymaker *The Inequality Paradox* is essential reading for understanding the global economy in its present state McWilliams is a fresh authoritative voice entering the global discussion making this book indispensable in preparing for the imminent economic challenges of our changing world

Background Notes on Sustainable, Productive and Resilient Agro-Food Systems: Value chains, human capital, and the 2030 Agenda Food and Agriculture Organization of the United Nations, Organisation for Economic Co-operation and Development, 2019-07-18 Agricultural production more than tripled between 1960 and 2015 owing in part to productivity enhancing technologies and a significant expansion in the use of land water and other natural resources for agricultural purposes Today more than ever agriculture faces multiple and complex challenges It has to provide sufficient safe and nutritious food to meet boosting demand by a growing and progressively more prosperous population and ensure food security for all Prepared to support the G20 Presidency of Japan and the G20 Agriculture Deputies these three background notes provide an overview on the following interlinked issues i the policy challenges for strengthening the participation of farmers into modern value chains and promoting value addition inclusion sustainability and rural economic growth ii the need for a transformation in the skillset of agricultural workers and a renewed focus on human capital development in agriculture and iii the contribution of agriculture to the realization of the 2030 Agenda for Sustainable

Development *The UK Regional-National Economic Problem* Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government On Unemployment Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology *Georgetown Journal of International Affairs, Summer/Fall 2015* Mike Fox, Angela Ribaud, 2015-07-31 The Georgetown Journal of International Affairs is the official publication of the Edmund A Walsh School of Foreign Service at Georgetown University Each issue of the journal provides readers with a diverse array of timely peer reviewed content penned by top policymakers

business leaders and academic luminaries The theme of this issue will be a look at the United Nations past present and future to commemorate its 70th anniversary The secondary theme will be global development

Rural Policies And Employment: Transatlantic Experiences Sophia M Davidova, Kenneth J Thomson, Ashok K Mishra, 2019-06-13 A unique title comparing rural policies and employment in the two most developed parts of the world the EU and USA While both regions are concerned for their vast rural areas each adopts a strikingly different approach to create and maintain employment there making rural space attractive to businesses and residents This book focuses on a major issue of socioeconomic and policy concern i e whether jobs and incomes can be protected or created in rural areas where often agriculture no longer provides a large and secure basis for employment Within a paired chapter structure covering both the European Union and the United States of America it deals with several themes of interest including farm policies labor entry and exit and rural and household enterprise diversification Specific special studies also analyze recent developments within countries or regions

Community Development for Social Change Dave Beck, Rod Purcell, 2020-03-04 Community Development for Social Change provides a comprehensive introduction to the theory and practice of community development and associated activities discusses best practice from global experience and links that to the UK context The book integrates the realities of practice to key underpinning theories human rights values and a commitment to promoting social justice A range of practice models are described and analysed including UK models popular education and community organising as well as a range of practice issues that need to be understood by community development workers For example strategies to promote individual and community empowerment challenging discrimination building and sustaining groups and critical reflection on practice Finally a range of case studies from the UK and overseas illustrates good practice in diverse contexts These case studies are analysed with reference to the values of community development the promotion of social justice and the underpinning theories It is an essential text for those on community development courses as well as for a range of workers including local government national and local voluntary agencies and community based organisations

The Strains of Commitment Keith Banting, Will Kymlicka, 2017-04-04 Building and sustaining solidarity is a compelling challenge especially in ethnically and religiously diverse societies Recent research has concentrated on forces that trigger backlash and exclusion The Strains of Commitment examines the politics of diversity in the opposite direction exploring the potential sources of support for an inclusive solidarity in particular political sources of solidarity The volume asks three questions Is solidarity really necessary for successful modern societies Is diversity really a threat to solidarity And what types of political communities political agents and political institutions and policies help sustain solidarity in contexts of diversity To answer these questions the volume brings together leading scholars in both normative political theory and empirical social science Drawing on in depth case studies historical and comparative research and quantitative cross national studies the research suggests that solidarity does not emerge spontaneously or naturally from economic and social processes but is inherently built or eroded though

political action The politics that builds inclusive solidarity may be conflicting in the first instance but the resulting solidarity is sustained over time when it becomes incorporated into collective typically national identities and narratives when it is reinforced on a recurring basis by political agents and most importantly when it becomes embedded in political institutions and policy regimes While some of the traditional political sources of solidarity are being challenged or weakened in an era of increased globalization and mobility the authors explore the potential for new political narratives coalitions and policy regimes to sustain inclusive solidarity
