**City of Forests City of Farms** is a history of recent urban forestry and agriculture policy and programs in New York City Centered on the 2007 initiative PlaNYC this account tracks the development of policies that increased sustainability efforts in the city and dedicated more than 400 million dollars to trees via the MillionTreesNYC campaign Lindsay K Campbell uses PlaNYC to consider how and why nature is constructed in New York City Campbell regards sustainability planning as a process that unfolds through the strategic interplay of actors the deployment of different narrative frames and the mobilizing and manipulation of the physical environment which affects nonhuman animals and plants as well as the city s residents Campbell zeroes in on a core omission in PlaNYC s original conception and funding Despite NYC having a long tradition of community gardening particularly since the fiscal crisis of the 1970s the plan contained no mention of community gardens or urban farms Campbell charts the change of course that resulted from burgeoning public interest in urban agriculture and local food systems She shows how civic groups and elected officials crafted a series of visions and plans for local food systems that informed the 2011 update to PlaNYC **City of Forests City of Farms** is a valuable tool that allows us to understand and disentangle the political decisions popular narratives and physical practices that shape city greening in New York City and elsewhere **The UK Regional-National Economic Problem**

Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation **The UK Regional National Economic Problem** brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average

standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

**Resilience in the Pacific and the Caribbean** Simon Hollis, 2020-10-26 This book critically examines the global diffusion and local reception of resilience through the implementation of Disaster Risk Reduction DRR programmes in Pacific and Caribbean island states Global efforts to strengthen local disaster resilience capacities have become a staple of international development activity in recent decades yet the successful implementation of DRR projects designed to strengthen local resilience remains elusive While there are pockets of success a gap remains between global expectations and local realities Through a critical realist study of global and local worldviews of resilience in the Pacific and Caribbean islands this book argues that the global advocacy of DRR remains inadequate because of a failure to prioritise a person orientated ethics in its conceptualization of disaster resilience This regional comparison provides a valuable lens to understand the underlying social structures that makes resilience possible and the extent to which local governments communities and persons interpret and modify their behaviour on risk when faced with the global message on resilience This book will be of much interest to students of resilience risk management development studies and area studies

New Engagement David Mickler, Tanya Lyons, 2013-06-01 Recent developments in both Africa and Australia have brought the two continents closer together. In Africa, a resources boom, greater political stability and the creation of the new regional institutions have contributed to economic and human development even if many challenges including conflict, poverty and exploitation remain. Australia has commercial and political interests in Africa and if it wants to be a significant global actor must engage with both Africa's challenges and its growing international influence. Since coming to power in 2007, Australian Labor governments have pursued new engagement with Africa after decades of relative neglect. This book, the first study of its kind, explores the key contexts for and dimensions of contemporary Australian foreign policy towards Africa. It highlights a deepening of diplomatic and political relations, a trebling of the official aid budget to Africa and over 50 billion of Australian based investment in Africa's resources sector and suggests measures to make such engagement sustainable and of mutual benefit. Contributions to the book come from academics, civil servants, diplomats and politicians.

Governance, Conflict, and Natural Resources in Africa Hany Gamil Besada, 2021-04-22 A country's abundant natural resources may serve as a curse or a blessing with the outcome often dependent on prevailing governance structures and experience managing these assets. Despite natural resource advantages, many African countries have failed to transform their enormous economic potential and wealth into tangible benefits such as sustainable socio-economic development, human security or peace. *Governance, Conflict and Natural Resources in Africa* reevaluates the role that foreign state-owned and private sector actors play in resource-rich states, whether stable post-conflict or fragile, in sub-Saharan Africa. Through research and an analysis of in-depth interviews with local stakeholders in Ghana, Sierra Leone and Ethiopia, Hany Besada explains how foreign state-owned and private sector corporations have contributed to economic growth at both the national and local levels in different resource-rich countries. This book reveals the unique challenges and opportunities created by these investors, demonstrating that new policies in business practices and operations have the potential to generate sustainable development and positive economic transformation. *Governance, Conflict and Natural Resources in Africa* puts forward a novel framework for understanding the role of private economic actors in extractive industries in Africa and sheds new light on foreign private sector contributions to capacity building and economic development.

Ownership and Governance of Companies Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite. Yet 27 years after apartheid, those business interests remain largely entrenched. Why? Did the South African business community play a role in engineering this outcome, perhaps recognising the apartheid era was over and jumping ship in time? Conversely, the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community. Yet despite black empowerment measures, corporate ownership remains largely in white hands and certainly in the hands of an elite few, even though no longer restricted to whites. This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread. Why have alternative

corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics
