interested in this volume Reassessing the Social Studies Curriculum Wayne Journell, 2016-05-03 The terrorist attacks of September 11 2001 dramatically changed many aspects of American society and the ramifications of that horrific event are still impacting the domestic and foreign policies of the United States Yet fifteen years after 9 11 an event that was predicted to change the scope of public education in the United States we find that the social studies curriculum remains virtually the same as before the attacks For a discipline charged with developing informed citizens prepared to enter a global economy such curricular stagnation makes little sense This book which contains chapters from many leading scholars within the field of social studies education both assesses the ways in which the social studies curriculum has failed to live up to the promises of progressive citizenship education made in the wake of the attacks and offers practical advice for teachers who wish to encourage a critical understanding of the post 9 11 global society in which their students live

Yearbook of International Organizations 2014-2015 (Volume 4) Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international

organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations Rethinking Climate Change, Conflict and Security Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of Geopolitics Qanat Dale Lightfoot, 2024-08-22 Qanats are ubiquitous yet unseen and a clever way to create streams where none exist in nature For 3 000 years they have made life possible in impossible places and still sustain life and livelihoods in many countries today After 30 years of field research Dale Lightfoot provides the first comprehensive study of the qanat and sheds new light on their unique locations and distribution their origins and history their ecology current status and use Qanats are remarkably engineered underground aqueducts using gravity to bring water to villages and towns where reliable flowing surface water is scarce or absent Although an ancient technology more than 46 000 of them still flow around the world today with their sustainable nature making them a focus of renewed interest Richly illustrated with images and a series of original maps this is the most complete record to date of the locations and distribution of qanats worldwide including examples from the Middle East North Africa Europe Central Asia China India Mexico and South America **Geopolitics** Jason Dittmer, Jo Sharp, 2014-06-27 It has been increasingly impossible to think about our changing world without coming across the term geopolitics In the wake of the invasion and occupation of Iraq by the United States United Kingdom and others geopolitics has been offered as an explanation for the occupation s failure to reinvent the Iraqi state and as a blueprint for future action But what is geopolitics Drawing both on academic and political material this book introduces readers to the concept of geopolitics from the first usage of the term to its more recent reconceptualisations The concept of geopolitics is introduced through four thematic sections Imperial

Geopolitics Cold War Geopolitics Geopolitics after the Cold War and Reconceptualising Geopolitics Each section includes key writings from a range of diverse and leading authors such as Said Agnew Dalby O Tuathail Gregory Barnett and Kaplan and is accompanied by a critical introduction by the editors to guide the reader through the material This Reader establishes the foundations of geopolitics while also introducing readers to the continuing significance of the concept in the 21st century This Reader provides an essential resource that exposes students to original writing The Editors provide a pathway through the material with Section Introductions to assist the readers understanding of the context of the material and impacts of the writings The readings included draw from a range of authors writing from a range of locations The Reader concludes with the latest changes in geopolitical thought incorporating feminist and other perspectives

Defence Planning and Uncertainty Stephan Frühling, 2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future
