membership **The Triumph of Improvisation** James Wilson, 2014-01-21 In *The Triumph of Improvisation* James Graham Wilson takes a long view of the end of the Cold War from the Soviet invasion of Afghanistan in December 1979 to Operation Desert Storm in January 1991. Drawing on deep archival research and recently declassified papers, Wilson argues that adaptation, improvisation, and engagement by individuals in positions of power ended the specter of a nuclear holocaust. Amid ambivalence and uncertainty, Mikhail Gorbachev, Ronald Reagan, George Shultz, George H. W. Bush, and a host of other actors engaged with adversaries and adapted to a rapidly changing international environment and information age in which global capitalism recovered as command economies failed. Eschewing the notion of a coherent grand strategy to end the Cold War, Wilson paints a vivid portrait of how leaders made choices, some made poor choices while others reacted prudently, imaginatively, and courageously to events they did not foresee. A book about the burdens of responsibility, the obstacles of domestic politics, and the human qualities of leadership, *The Triumph of Improvisation* concludes with a chapter describing how George H. W. Bush oversaw the construction of a new configuration of power after the fall of the Berlin Wall, one that resolved the fundamental components of the Cold War on Washington's terms.

Memorializing Pearl Harbor Geoffrey M. White, 2016-03-31 *Memorializing Pearl Harbor* examines the challenge of representing history at the site of the attack that brought America into World War II. Analyzing moments in which history is re-presented in commemorative events, documentary films, museum design, and educational programming, Geoffrey M. White shows that the memorial to the Pearl Harbor bombing is not a fixed or singular institution. Rather, it has become a site in which many histories are performed, validated, and challenged. In addition to valorizing military service and sacrifice, the memorial has become a place where Japanese veterans have come to seek recognition and reconciliation, where Japanese Americans have sought to correct narratives of racial mistrust, and where Native Hawaiians have challenged their ongoing erasure from their own land. Drawing on extended ethnographic fieldwork, White maps these struggles onto larger controversies about public history, museum practices, and national memory.

Ideology and Meaning-Making under the Putin Regime Marlene Laruelle, 2025-01-14 Much has been written to try to understand the ideological characteristics of the current Russian government as well as what is happening inside the mind of Vladimir Putin. Refusing pundits' clichés that depict the Russian regime as either a cynical kleptocracy or the product of Putin's grand Machiavellian designs, *Ideology and Meaning-Making under the Putin Regime* offers a critical genealogy of ideology in Russia today. Marlene Laruelle provides an innovative multi-method analysis of the Russian regime's ideological production process and the ways it is operationalized in both domestic and foreign policies. *Ideology and Meaning-Making under the Putin Regime* reclaims the study of ideology as an unavoidable component of the tools we use to render the world intelligible and represents a significant contribution to the scholarly debate on the interaction between ideas and policy decisions. By placing the current Russian regime into a broader context of different strains of strategic culture, ideological interest groups, and intellectual history, this book gives readers key insights

into how the Russo Ukrainian War became possible and the role ideology played in enabling it *Power, Law, and Maritime Order in the South China Sea* Tran Truong Thuy, Le Thuy Trang, 2015-09-04 Over the last few decades there has been growing recognition of the importance of a peaceful and stable South China Sea for Indo Pacific security and development a recognition that has been underlain paradoxically by the increasingly precarious situation in this body of water that straddles critical shipping lanes from the Indian to the Pacific Ocean This book informs its readership of the most recent developments in the South China Sea with insightful and prescient analyses from both legal and international relations perspectives It delves into the policy perspectives and deliberations of the various relevant regional and extra regional actors in the South China Sea dispute the exercise of international law in the context of the changing regional political landscape and the promise and pitfalls of past current and potential initiatives to manage and settle the dispute Written by some of the most well known scholars and knowledgeable insiders in the fields South China Sea studies the collection offers a wide array of diverse views that should help enrich the ongoing global discussion on conflict management and resolution in the South China Sea *Rival Visions* Dustin Gish, Andrew Bibby, 2021-02-05 The emergence of the early American republic as a new nation on the world stage conjured rival visions in the eyes of leading statesmen at home and attentive observers abroad Thomas Jefferson envisioned the newly independent states as a federation of republics united by common experience mutual interest and an adherence to principles of natural rights His views on popular government and the American experiment in republicanism and later the expansion of its empire of liberty offered an influential account of the new nation While persuasive in crucial respects his vision of early America did not stand alone as an unrivaled model The contributors to *Rival Visions* examine how Jefferson s contemporaries including Washington Adams Hamilton Madison and Marshall articulated their visions for the early American republic Even beyond America in this age of successive revolutions and crises foreign statesmen began to formulate their own accounts of the new nation its character and its future prospects This volume reveals how these vigorous debates and competing rival visions defined the early American republic in the formative epoch after the revolution *Australians at Geneva* James Cotton, 2022-11-01 After the dubious justice of the Treaty of Versailles and the turmoil of the interwar years the League of Nations is mainly remembered as a body that failed to create mechanisms that might have forestalled the horrors of Nazism fascism and the Second World War It has understandably been overshadowed by the United Nations that larger more globally representative body which grew from the League and which was founded on more unequivocally noble principles in the aftermath of a clear cut victory of good over evil But as the limitations of the United Nations become ever more apparent we can look with more sympathy at the League and consider what we might learn from the endeavours of those driving this first attempt at global governmental coordination As James Cotton relates in this illuminating account a surprising number of Australians lent their talents and enthusiasm to this internationalist project and Australian interests were prominently represented Former Prime Minister Stanley Bruce was there along with numerous

other Australian men and women who made important contributions to international deliberations on questions of global organisation and interaction This deeply researched and carefully realised story will recast understandings of both the League itself and the place within it of prominent interwar Australian internationalists Islam and the Liberal State Stephen H. Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening
