

# YOU TRY 1: FINDING ANGLE MEASURES

## ANSWER

What is the value of each variable?

$$70 = \frac{W - 110}{2}$$

$$70 \cdot 2 = W - 110$$

$$140 = W - 110$$

$$+110 \quad +110$$

---

$$250 = W$$

$$y = \frac{110 - 30}{2}$$

$$y = \frac{80}{2}$$

$$y = 40$$

$$35 = \frac{x + 30}{2}$$

$$35 \cdot 2 = x + 30$$

$$70 = x + 30$$

$$-30 \quad -30$$

---

$$40 = x$$

geometry in the style of Hilbert including a discussion of the construction of measure in that system ultimately building up to the Saccheri Legendre Theorem Part 2 provides a glimpse of classical Euclidean geometry with an emphasis on concurrence results such as the nine point circle Part 3 studies transformations of the Euclidean plane beginning with isometries and ending with inversion with applications and a discussion of area in between Part 4 is dedicated to the development of the Poincaré disk model and the study of geometry within that model While this material is traditional Geometry Illuminated does bring together topics that are generally not found in a book at this level Most notably it explicitly computes parametric equations for the pseudosphere and its geodesics It focuses less on the nature of axiomatic systems for geometry but emphasizes rather the logical development of geometry within such a system It also includes sections dealing with trilinear and barycentric coordinates theorems that can be proved using inversion and Euclidean and hyperbolic tilings

Moore, Efstratios Prassidis, 2010-04-19 This new book for mathematics and mathematics education majors helps students gain an appreciation of geometry and its importance in the history and development of mathematics The material is presented in three parts The first is devoted to a rigorous introduction of Euclidean geometry the second covers various noneuclidean geometries and the last part delves into symmetry and polyhedra Historical contexts accompany each topic Exercises and activities are interwoven with the text to enable the students to explore geometry Some of the activities take advantage of geometric software so students in particular future teachers gain a better understanding of its capabilities Others explore the construction of simple models or use manipulatives allowing students to experience the hands on creative side of mathematics While this text contains a rigorous mathematical presentation key design features and activities allow it to be used successfully in mathematics for teachers courses as well
