Dissection of the Right Triangle

Right Triangle Patterns

Just as a student studies by making a grid, so a geometer, with a triangle pattern, constructs the square, with a square. This student, this geometer, uses three basic parts: the square, the right triangle, and the smaller triangles. These three smaller triangles form the right triangle. The geometer then constructs the square, with a square. This student, this geometer, uses three basic parts: the square, the right triangle, and the smaller triangles. These three smaller triangles form the right triangle. The geometer then constructs the square, with a square.

Now, consider the figure below, which shows the figure above.

1. Show that the four right triangles are congruent, using the Hypotenuse-Leg Theorem.
The triangles are right triangles. The hypotenuses are equal, as are the legs of the squares. The legs of the triangles are equal, as are the legs of the squares.
