Motion and Waves* Shadwick,2015 Force and Motion Jason Zimba,2009-06-01 Isaac Newton developed three laws of
motion that govern the everyday world These laws are usually presented in purely mathematical forms but Jason Zimba
breaks with tradition and treats them visually This unique approach allows students to appreciate the conceptual
underpinnings of each law before moving on to qualitative descriptions of motion and finally to the equations and their
solutions Zimba has organized the book into seventeen brief and well sequenced lessons which focus on simple manageable
topics and delve into areas that often cause students to stumble Each lesson is followed by a set of original problems that
have been student tested and refined over twenty years Zimba illustrates the laws with more than 350 diagrams an
innovative presentation that offers a fresh way to teach the fundamentals in introductory physics mechanics and kinematics
