**Neuroethics in Higher Education Policy** Dana Lee Baker, Brandon Leonard, 2016-11-18 This book focuses on neuroethics in higher education in the United States After introducing readers to the philosophical and policy foundations of the neuroethics of higher education this book explores essential conundrums in the neuroethical practice of higher education in modern democracies Focusing on neuroethics from the perspective of universally designed learning and policy design sets this project apart from other work in the field Advances in neuroscience and changes in attitudes towards disability have identified mechanisms by which higher education infrastructures interact with both individuals considered neurotypical and those with identified disabilities to diminish students capacity to enter persist and complete higher education Policy to date has focused on identified disabilities as a requirement for accommodations This strategy both underestimates the effect of ill fitting infrastructures on those considered neurologically typical and serves to stratify the student body As a result neuroethical gaps abound in higher education

**Equity in Science** Julie R. Posselt, 2020-09-01 STEM disciplines are believed to be founded on the idea of meritocracy recognition earned by the value of the data which is objective Such disciplinary cultures resist concerns about implicit or structural biases and yet year after year scientists observe persistent gender and racial inequalities in their labs departments and programs In Equity in Science Julie Posselt makes the case that understanding how field specific cultures develop is a crucial step for bringing about real change She does this by examining existing equity diversity and inclusion efforts across astronomy physics chemistry geology and psychology These ethnographic case studies reveal the subtle ways that exclusion and power operate in scientific organizations and sometimes within change efforts themselves Posselt argues that accelerating the movement for inclusion in science requires more effective collaboration across boundaries that typically separate people and scholars across the social and natural sciences across the faculty student administrator roles and across race gender and other social identities Ultimately this book is a call for academia to place equal value on expertise and on those who do the work of cultural translation Posselt closes with targeted recommendations for individuals departments and disciplinary societies for creating systemic sustainable change
