*Beyond the Tragedy in Global Fisheries* D. G. Webster, 2017-09-08 An analysis of how responsive governance has shaped the evolution of global fisheries in cyclical patterns of depletion and

rebuilding dubbed the management treadmill The oceans are heavily overfished and the greatest challenges to effective fisheries management are not technical but political and economic In this book D G Webster describes how the political economy of fisheries has evolved and highlights patterns that are linked to sustainable transitions in specific fisheries Grounded in the concept of responsive governance Webster s interdisciplinary analysis goes beyond the conventional view of the tragedy of the commons Using her Action Cycle Structural Context framework she maps long running patterns that cycle between depletion and rebuilding in a process that she terms the management treadmill Webster documents the management treadmill in settings that range from small coastal fishing communities to international fisheries that span entire oceans She identifies the profit disconnect in which economic incentives are out of sync with sustainable use and the power disconnect in which those who experience the costs of overexploitation are politically marginalized She examines how these disconnects shaped the economics of expansion and documents how political systems failed to prevent related cycles of serial resource depletion Webster also traces the increasing use of restrictive management in response to worsening fisheries crises and the emergence of new noncommercial interests that demand greater management but also generate substantial conflict She finds that the management treadmill is speeding up with population growth and economic development and so concludes that sustainable fisheries can only exist within a sustainable global economic system

academic public high school government and professional libraries      Historical Dictionary of the Green Movement Miranda Schreurs, Elim Papadakis, 2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of *Historical Dictionary of the Green Movement* contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement      **Food Security** Bryan L. McDonald, 2013-04-23 Throughout history human societies have struggled to ensure that all people have access to sufficient food to lead active and healthy lives Despite great global effort events of the early 21st century clearly demonstrate that food remains a pressing challenge which has significant implications for security In this book Bryan McDonald explores how processes of globalization and global change have reshaped food systems in ways that have significant impacts for the national security of states and the human of communities and individuals Over the past few decades local regional and national food systems have increasingly become intertwined in an emerging global food network This complex web of relations includes the production harvest processing transport and consumption of food While this global food network provides new opportunities for improving health and well being it also gives rise to new sources of security threats and vulnerabilities This detailed and comprehensive introduction to the major issues impacting global food security will be essential reading for students and scholars in security studies international politics and environmental studies      *The Shadows of Consumption* Peter Dauvergne, 2010-09-24 An environmentalist maps the hidden costs of overconsumption in a globalized world by tracing the environmental consequences of five commodities *The Shadows of Consumption* gives a hard hitting diagnosis many of the earth s ecosystems and billions of its people are at risk from the consequences of rising consumption Products ranging from cars to hamburgers offer conveniences and pleasures but as Peter Dauvergne makes clear global political and economic processes displace the real costs of consumer goods into distant ecosystems communities and timelines tipping into crisis people and places without the power to resist In *The Shadows of Consumption* Peter Dauvergne maps the costs of consumption that remain hidden in the shadows cast by globalized corporations trade and

finance Dauvergne traces the environmental consequences of five commodities automobiles gasoline refrigerators beef and harp seals In these fascinating histories we learn for example that American officials ignored warnings about the dangers of lead in gasoline in the 1920s why China is now a leading producer of CFC free refrigerators and how activists were able to stop Canada s commercial seal hunt in the 1980s but are unable to do so now Dauvergne s innovative analysis allows us to see why so many efforts to manage the global environment are failing even as environmentalism is slowly strengthening He proposes a guiding principle of balanced consumption for both consumers and corporations We know that we can make things better by driving a high mileage car eating locally grown food and buying energy efficient appliances but these improvements are incremental local and insufficient More crucial than our individual efforts to reuse and recycle will be reforms in the global political economy to reduce the inequalities of consumption and correct the imbalance between growing economies and environmental sustainability

**Advancing the Global Agenda for Human Rights, Vulnerable Populations, and Environmental Sustainability** Mary V. Alfred, Petra A. Robinson, Elizabeth A. Roumell, 2021-10-01 For over 70 years the United Nations has worked to advance human conditions globally through its historic agenda for a more peaceful prosperous and just world Through the work of the General Assembly and other programs like the UNESCO World Conferences on Adult Education the organization has taken a leading role in bringing world leaders together to dialogue on world issues and to set agendas for advancing social and economic justice among and within the regions of the world The underlying themes of the United Nations agenda over the years have been world peace economic justice addressing the needs of the world s most vulnerable populations and protecting the environment We draw from the two last two declarations from which the Millennium Development Goals September 2000 and the Sustainable Development Goals September 2015 were adopted by world leaders with a focus on addressing the needs of the most vulnerable populations In this declaration world leaders committed to uphold the long standing principles of the organization and to combat extreme poverty hunger disease illiteracy environmental degradation and discrimination and violence against women The overall objective of the book is to highlight the conditions of vulnerable populations from various contexts globally and the role adult and higher education can play and is playing in advancing the United Nations agenda of social and economic justice and environmental sustainability Adult education through research teaching and service engagements is contributing to this ongoing effort but as many scholars have noted our work remains invisible and undocumented Therefore this book highlights adult education s critical partnership in addressing these global issues It will also begin to fill the void that exists in adult education literature on internationalization of the field

**Where the Waters Divide** Michael Mascarenhas,2012-07-13 This timely and important scholarship advances an empirical understanding of Canada s contemporary Indian problem *Where the Waters Divide* is one of the few book monographs that analyze how contemporary neoliberal reforms in the manner of de regulation austerity measures common sense policies privatization etc are woven through and shape contemporary racial inequality in Canadian society Using recent controversies in drinking water contamination and solid waste and sewage pollution *Where the Waters Divide* illustrates in concrete ways how cherished notions of liberalism and common sense reform neoliberalism also

constitute a particular form of racial oppression and white privilege Where the Waters Divide brings together theories and concepts from four disciplines sociology geography Aboriginal studies and environmental studies to build critical insights into the race relational aspects of neoliberal reform In particular the book argues that neoliberalism represents a key moment in time for the racial formation in Canada one that functions not through overt forms of state sanctioned racism as in the past but via the morality of the marketplace and the primacy of individual solutions to modern environmental and social problems Furthermore Mascarenhas argues because most Canadians are not aware of this pattern of laissez faire racism and because racism continues to be associated with intentional and hostile acts Canadians can dissociate themselves from this form of economic racism all the while ignoring their investment in white privilege Where the Waters Divide stands at a provocative crossroads Disciplinarily it is where the social construction of water an emerging theme within Cultural Studies and Environmental Sociology meets the social construction of expertise one of the most contentious areas within the social sciences It is also where the political economy of natural resources an emerging theme in Development and Globalization Studies meets the Politics of Race Relations an often understudied area within Environmental Studies Conceptually the book stands where the racial formation associated with natural resources reform is made and re made and where the dominant form of white privilege is contrasted with anti neoliberal social movements in Canada and across the globe

*Environmental Education in a Climate of Reform* Sylvia Christine Almeida, 2015-10-29 India is grappling with serious environmental issues that have been largely sparked by its galloping economy As a measure of its seriousness to reduce the environmental impacts it has spearheaded numerous policy initiatives One of the major thrusts of the proposed initiatives to curb environmental degradation has been to create an informed and well educated citizenry The federal mandates have triggered new curriculum policies and the compulsory teaching of environmental and sustainability education at all levels in all education institutions This volume examines the policy practice conundrum It looks at how national and international policy reforms reach practitioners in this case teacher educators Furthermore it unravels how teacher educators understand environmental education the ways in which they negotiate its demands on their busy schedules what helps them in determining relevant issues within this and finally how they implement these policies in their everyday practices It is evident from this book that while there have been some really well meaning development of policies their impact on teacher educators practice and therefore student teachers learning about Environmental Education is limited The study showed that while these teacher educators had a clear understanding of the environment and saw the need importance of incorporating Environmental Education in their daily practices they had very little scope to do so There were numerous factors that constrained implementation The book provides inputs on global policy practice gaps It offers valuable insights to a global audience grappling with understanding the ways in which environmental education policies are put into practice in emerging economies like India The final argument is thesis that while policy reforms are a step in the right direction they need to be

backed up with strong implementation systems in order to be successful div
