Terrorizing Latina/o Immigrants Anna Sampaio, 2015-10 Examines how the proliferation of security measures resulting from the war on terror are racialized and gendered and how they impose inequitable burdens on Latina o immigrants demonstrating how the ascendancy of America as a security state serves as a template to scrutinize harass and encumber immigrants while also reconfiguring citizenship

Black Tide Antonia Juhasz, 2011-03-16 A searing look at the human face of BP s disaster in the gulf It is the largest oil disaster in American history and it could happen again It is more than a story of ruined beaches dead wildlife corporate spin political machinations and financial fallout It is a riveting human drama filled with people whose lives will forever be defined as before and after the gulf oil disaster Black Tide is the only book to tell this story through the perspective of people on all sides of the catastrophe from those who lost their lives loved ones and livelihoods to those who made the policies that set the devastating event in motion those who cut the corners that put corporate profits over people and the environment and those who have committed their lives to ensuring that such an event is never repeated Dramatic and compelling Black Tide exposes the human failings and human cost of the largest oil disaster in American history and how it could easily happen again We cannot allow the BP disaster to be pushed from public view the way BP used chemical dispersants to hide the oil These remarkable stories of loss heroism and culpability are a vivid reminder that this catastrophe will be with us for decades and that we have not yet made the changes necessary to prevent destruction in the future Naomi Klein author of *The Shock Doctrine* *The Rise of Disaster Capitalism* It s hard to imagine a better person to turn loose on this epochal disaster than Antonia Juhasz with her compassionate heart vivid prose and rich expertise in both oil and economic policy From oil smeared beaches to the drilling rig s control room to the big picture of Big Oil and the governments they push around It s not just about disaster it s a series of encounters with real people from oceanographers to oyster shuckers striving to make things right Black Tide is riveting infuriating and incredibly important Rebecca Solnit author of *A Paradise Built in Hell* *The Extraordinary Communities that Arise in Disaster* Praise for *The Tyranny of Oil* Reminds us that those who don t learn the lessons of history are fated to repeat its mistakes USA Today A timely blistering critique white hot Kirkus starred review A thorough readable takedown of Big Oil Publishers Weekly A brave groundbreaking case study A good first step toward true energy independence is to read this insightful book The Christian Science Monitor

The Uyghur Lobby Yu-Wen Chen, 2013-12-17 An upsurge in violence between Uyghur and Han in China s far western region of Xinjiang has gained increased media and academic attention in recent years as was evidenced in the July 2009 riots Numbering over eight million the Uyghur are China s fifth largest minority nationality and their mounting aspiration for obtaining more autonomy has contributed to the recent ethnic conflicts in the region This book looks at those who are seeking to preserve the Uyghur identity and support the secession of Xinjiang from China in order to create their own independent state by exploring the global operations and sister groups of the Uyghur diaspora umbrella organization the

World Uyghur Congress WUC It examines the networks of the WUC the coalitions it has formed the strategies the organization pursues to raise public awareness about Uyghur issues around the globe and looks at the actors that have emerged as key players in the contemporary WUC network Further this book shows that the Uyghur lobby is not a unified movement but that the local groups that it consists of are highly constrained by the broader domestic politics of their host countries a fact which has a significant impact on the lobby's ability to realize its strategic and political ambitions In turn Yu Wen Chen gauges the impact of the WUC on public opinion and policymakers in the world's democracies and shows how since Uyghur organizations have been given legitimacy by liberal democracies and international governmental organizations they can no longer be considered merely splintered members of a far flung diaspora locked in a one sided struggle with Beijing Indeed Uyghur activists can and do use their hard won legitimacy as legal migrants and asylum seekers to influence politics in their host countries This unique and timely study reveals how an issue concerning a Chinese minority has been catapulted onto the wider global political stage and as such it will be of great interest to students and scholars working on Chinese politics the Uyghur issue and minority and ethnic politics social movements human rights and international politics more broadly

Offshore Oil and Gas Installations Security Mikhail Kashubsky, 2015-12-16 Oil and natural gas which today account for over 60% of the world's energy supply are often produced by offshore platforms One third of all oil and gas comes from the offshore sector However offshore oil and gas installations are generally considered intrinsically vulnerable to deliberate attacks The changing security landscape and concerns about the threats of terrorism and piracy to offshore oil and gas installations are major issues for energy companies and governments worldwide But how common are attacks on offshore oil and gas installations Who attacks offshore installations Why are they attacked How are they attacked How is their security regulated at the international level How has the oil industry responded This timely and first of its kind publication answers these questions and examines the protection and security of offshore oil and gas installations from a global industry wide and company level perspective Looking at attacks on offshore installations that occurred throughout history of the offshore petroleum industry it examines the different types of security threats facing offshore installations the factors that make offshore installations attractive targets the nature of attacks and the potentially devastating impacts that can result from attacks on these important facilities It then examines the international legal framework state practice and international oil and gas industry responses that aim to address this vital problem Crucially the book includes a comprehensive dataset of attacks and security incidents involving offshore oil and gas installations entitled the Offshore Installations Attack Dataset OIAD This is an indispensable reference work for oil and gas industry professionals company security officers policy makers maritime lawyers and academics worldwide

No Rain in the Amazon Nikolas Kozloff, 2010-04-13 Acting as the planet's air conditioner the rainforest sucks up millions of tons of greenhouse gases and stores them safely out of the atmosphere South America's deforestation threatens to unleash a kind of carbon bomb that will

add to our already deteriorating climate difficulties As he travels across Peru and Brazil recognized South America expert Nikolas Kozloff talks to locals scientists and activists about the rainforest and what should be done to avert its collapse Drawing on his expertise of South American politics Kozloff argues that cooperation between the world s countries is essential in turning back the tide of climate change and that the fate of the planet depends on our response to environmental problems within the southern hemisphere **Greenpeace** ,1990 *Cheaponomics* Michael Carolan,2014-03-21 Do you really think you are getting a good deal when given that free mobile phone for switching service providers if a multinational retailer undercuts its competitors or by the fact that food is relatively cheaper today in many countries than ever before Think again As Michael Carolan clearly shows in this compelling book cheapness is an illusion The real cost of low prices is alarmingly high It is shown for example that citizens are frequently subsidising low prices through welfare support to poorly paid workers in their own country or relying on the exploitation of workers in poor countries for cheap goods Environmental pollution may not be costed into goods and services but is paid for indirectly by people living away from its source or by future generations Even with private cars when the total costs of this form of mobility are tallied it proves to be an astronomically expensive model of transportation All of these costs need to be accounted for The author captures these issues by the concept of cheaponomics The key point is that costs and risks are socialised we all pay for cheapness but not at the point of purchase Drawing on a wide range of examples and issues from over consumption and waste to over work unemployment inequality and the depersonalising of communities it is convincingly shown that cheapness can no longer be seen as such a bargain Instead we need to refocus for a better sense of well being social justice and a balanced approach to prosperity **Professional Perspectives on Banking and Finance** Moorad Choudhry,2024-06-12 With 100% emphasis on accessible clear and applicable advice Professional Perspectives on Banking and Finance provides suggestions to instil best practice in any commercial bank **A Handbook of Food Crime** Allison Gray,Ronald Hinch,2018-05-09 Food today is over corporatized and under regulated It is involved in many immoral harmful and illegal practices along production distribution and consumption systems These problematic conditions have significant consequences on public health and well being nonhuman animals and the environment often simultaneously In this insightful book Gray and Hinch explore the phenomenon of food crime Through discussions of food safety food fraud food insecurity agricultural labour livestock welfare genetically modified foods food sustainability food waste food policy and food democracy they problematize current food systems and criticize their underlying ideologies Bringing together the best contemporary research in this area they argue for the importance of thinking criminologically about food and propose radical solutions to the realities of unjust food systems Management Ethics and Talmudic Dialectics Nathan Lee Kaplan,2014-07-08 Nathan Lee Kaplan develops a talmudic perspective on management ethics By analyzing the central ethical dilemmas of corporate managers in light of applicable traditions from the Oral Torah this book offers a critical bridge between the contemporary business corporation and rabbinic

Judaism's foundational tradition. The issues studied thereby include organizational culture, fraud and corruption, whistle blowing, investor and employment relations, executive compensation, corporate social responsibility, and environmental sustainability.

Recognizing Green Skills Through Non-formal Learning Margarita Pavlova, Madhu Singh, 2022-08-09. This open access book looks into the roles and practices of small and micro enterprises in formal and informal economies across seven countries and one territory in terms of how they contribute to environmental and sustainable development and green skills promotion. By taking into account the perspectives in these four sectors: catering, automotive, waste management, and polyvinyl chloride production, this book maps environmental green practices in the region, identifying mechanisms used to assess existing skills, i.e. knowledge, skills, and competencies, and evaluating the potential for green skills inclusion in recognition, validation, and accreditation.

Constitutional Resilience in South Asia Swati Jhaveri, Tarunabh Khaitan, Dinesha Samararatne, 2023-06-01. South Asia has had a tumultuous and varied experience with constitutional democracy that predates the recent rise in populism and its study in established democracies. And yet this region has remained largely ignored by constitutional studies and democracy scholars. This book addresses this gap and presents a contribution to the South Asia centric literature on the topic of the stability and resilience of constitutional democracies. Chapters deal not only with relatively well known South Asian countries such as India, Bangladesh, Pakistan, and Sri Lanka, but also with countries often ignored by scholars such as Bhutan, Nepal, Maldives, and Afghanistan. The contributions consider the design and functioning of an array of institutions and actors, including political parties, legislatures, the political executive, the bureaucracy, courts, fourth branch guarantor institutions such as electoral commissions, the people, and the military, to examine their roles in strengthening or undermining constitutional democracy across South Asia. Each chapter offers a contextual and jurisdictionally tethered account of the causes behind the erosion of constitutional democracy, and some examine the resilience of constitutional institutions against democratic erosion.

Brandjack Q. Langley, 2016-04-30. Containing 90 case studies, including BP, Beyoncé, Pizza Hut, and Chrysler, this is the first book to analyze brandjacking when organizations lose control of their brand's image online. Combining crisis communication and social media, this book charts the trend's growth, offering advice to those who find themselves at the mercy of brand pirates.

Consumer Society and Ecological Crisis Leslie M. Meier, 2022-12-15. *Consumer Society and Ecological Crisis* advances a critique of consumer capitalism and its role in driving environmental degradation and climate crisis, placing a spotlight on how marketing and distribution activities help maintain unsustainable levels of consumption. Rather than focusing on the most visible sites of promotional communication, Meier examines less conspicuous facets of marketing and logistics in distinct chapters on plastic packaging, e-commerce, and sustainability pledges in the fossil fuel sector. These three main chapters each explore links between ecological crisis and consumer capitalism, drawing on critical theory and Marxist thought. The topics of consumer convenience, speed, and economic growth, and the role of fossil fuels as guarantor of these logics of consumer society, unite the critical analysis.

Situated in the field of media and communication studies and adopting an interdisciplinary approach this book will be of interest to academics researchers and students in the areas of media and communication studies cultural studies sociology geography philosophy political science and advertising Climate Change and Social Inequality Merrill Singer, 2018-10-03 The year 2016 was the hottest year on record and the third consecutive record breaking year in planet temperatures The following year was the hottest in a non El Nino year Of the seventeen hottest years ever recorded sixteen have occurred since 2000 indicating the trend in climate change is toward an ever warmer Earth However climate change does not occur in a social vacuum it reflects relations between social groups and forces us to contemplate the ways in which we think about and engage with the environment and each other Employing the experience near anthropological lens to consider human social life in an environmental context this book examines the fateful global intersection of ongoing climate change and widening social inequality Over the course of the volume Singer argues that the social and economic precarity of poorer populations and communities from villagers to the urban disadvantaged in both the global North and global South is exacerbated by climate change putting some people at considerably enhanced risk compared to their wealthier counterparts Moreover the book adopts and supports the argument that the key driver of global climatic and environmental change is the global economy controlled primarily by the world's upper class which profits from a ceaseless engine of increased production for national middle classes who have been converted into constant consumers Drawing on case studies from Alaska Ecuador Bangladesh Haiti and Mali Climate Change and Social Inequality will be of great interest to students and scholars of climate change and climate science environmental anthropology medical ecology and the anthropology of global health

Contentious Politics in Brazil and China December Green, Laura Luehrmann, 2018-05-15 Contentious Politics in Brazil and China Beyond Regime is a highly accessible and compelling examination of two fast emerging countries in the global arena It is not common to see Brazil and China examined side by side but authors December Green and Laura Luehrmann show the utility of this unorthodox comparison By moving beyond region and regime this book offers a thought provoking analysis of two very different countries dealing with many concerns and problems in surprisingly similar ways With a focus on current issues Contentious Politics in Brazil and China covers migration urbanization criminality the environment sexual politics and HIV AIDS response foreign policy and international relations This text not only illuminates each country's realities more clearly than traditional regional or regime type comparisons can but it offers unexpected insights into the study of state society relations **Policing and CBRN Hazards** Patrick Wengler, 2023-07-31 This book makes an important contribution to police scholarship by focusing on the critical need for law enforcement personnel to receive education on chemical biological radiological nuclear CBRN hazards Under the CBRN umbrella are chemical warfare agents toxic industrial chemicals biologically derived toxins radiological particulate hazards and other agents any of which have the potential to inflict bodily harm incapacitation or death Such weapons have been a part of human history for centuries starting

with biological warfare later shifting over to chemical warfare and in the last century radiological and nuclear warfare The greater availability and accessibility of such materials necessitates that first response and investigation is no longer limited to the military but is required of police forces reacting to incidents in the community whether acts of terrorism traffic accidents or standard industrial incidents In this book it is argued that basic knowledge of CBRN is essential for police officers at all levels to assess and protect crime scenes as well as to investigate cases involving CBRN materials The author uses case studies and technical education to instruct police on how and when CBRN agents can be used maliciously and the best methods for identifying analysing monitoring and investigating related incidents The text makes a clear case for integrating CBRN studies into police education so that first responders are enabled to assess incidents and share information with emergency management and other services to determine the most effective equipment and personnel to deploy This book is essential for police educators and trainers in both universities and police academies those administering or engaged in in service police training and scholars studying policing criminal justice and terrorism
