Fang,Chi Lau,Cheng Yan,2024-02-14 The Allocation of Regulatory Competence in the EU Emissions Trading Scheme

Josephine van Zeben,2014-04-17 The European Union s Emissions Trading System EU ETS is the world s largest carbon trading market This book offers a new perspective on the EU ETS as a multi level governance regime in which the regulatory process is composed of three distinct competences norm setting implementation and enforcement Are these competences best combined in a single regulator at one level of government or would they be better allocated among a variety of regulators at different levels of government The combined legal economic and political analysis in this book reveals that the actual allocation of competences within the EU ETS diverges from a hypothetical ideal allocation in important ways and provides a political economy explanation for the existing allocation of norm setting implementation and enforcement competences among various levels of European government

Vulnerability and the Legal Organization of Work Martha Albertson Fineman,Jonathan W. Fineman,2017-07-06 This book uses the concepts of vulnerability and resilience to analyze the situation of individuals and institutions in the context of the employment relationship It is based on the premise that both employer and employee are vulnerable to various social economic and political forces although differently so It demonstrates how in responding to those complementary institutional relationships of employer and employee the state unequally and inequitably favors employers over employees Several chapters included in

this collection also consider how the state shapes creates and maintains through law the social identities of employer and employee and how that legal regime operates as the allocation of power and privilege This unique and fundamental role of the state in defining the employment relationship profoundly affects the respective abilities and degree of resiliency of actual employers and employees Other chapters explore how attention to the respective vulnerability and resilience of those who do and those who direct work in assessing the employment relationship can raise fundamental questions of social justice and suggest new avenues for critical engagement with labor and employment law Collectively these pieces articulate a framework for imaging what would constitute an appropriately Responsive State in the employment context and how those interested in social justice might begin to use the concepts of vulnerability and resilience in their arguments
