Mopar Small-Blocks Larry Shepard, 2016-10-14 The LA series small block Chrysler engine is a powerful efficient and quick revving engine that has dutifully powered millions of Chrysler Dodge Plymouth cars and trucks from 1964 to 2003. And it's also a power unit for many renowned Mopar muscle cars including the Charger Barracuda Challenger Dart and others. The LA designates the small block as Lightweight A which was a huge improvement over the previous A generation engine. With its compact size 50 pound weight savings thin wall casting and polyspherical heads it cranked out a lot of torque and horsepower which made it ideally suited for the street and a formidable opponent on the track. Although this venerable small block has delivered impressive performance in stock trim it can be easily modified to produce much greater power for almost any application. The LA was offered in 273 318 340 and 360 ci iterations and a full range of aftermarket products are offered for these engines. Mopar engine expert and author Larry Shepard identifies the best parts and clearly guides you through the specific techniques to extract maximum performance from this platform. In particular he delves into the heads cams and valvetrain products and modifications that will achieve your horsepower goals. In addition he provides in depth build up instruction for other essential components blocks cranks pistons rods ignition systems intakes carburetors and exhaust. If you own an LA small block powered Mopar car or truck this invaluable guidance and instruction will allow you to optimize performance and maintain reliability. Whether you're building an engine for street street strip or racing this vital information saves you save time money and delivers results. Add this to your Mopar library today.
