1535 Eileen Power, 2019-11-21 Eileen Power's *Medieval English Nunneries c 1275 to 1535* offers a groundbreaking exploration of the socio economic and spiritual lives of English nuns during a transformative period in medieval history. Power meticulously examines a wealth of primary sources blending rigorous historical analysis with vivid narrative flair to illuminate the complex roles that nunneries played in their communities. Through her discerning lens, she captures the tensions between monastic life and the encroaching influences of the Reformation, situating the nuns not merely as passive agents but as active participants in contextual power dynamics, particularly in the face of an evolving England. Eileen Power, a pioneer in the field of women's history and medieval studies, draws on her extensive academic background and personal passion for uncovering women's stories often overlooked in traditional historiography. Her commitment to enriching the understanding of medieval women is evident in her relentless pursuit of archival research and her efforts to weave these narratives into the broader historical tapestry of the era. Power's scholarship often reflects her progressive views on women's agency, providing context to her focus on nunneries as vibrant social structures rather than mere religious refuges. This book is essential for historians, scholars, and readers interested in medieval studies, women's history, and religious life. Power's eloquent prose and meticulous research make her findings accessible, encouraging readers to reconsider the roles of women in history. *Medieval English Nunneries* is not just a scholarly resource; it is a compelling narrative that invites readers to engage with the past in profound and meaningful ways.

Bishops, Clerks, and Diocesan Governance in

Thirteenth-Century England Michael Burger, 2012-10-22 This book investigates how bishops deployed reward and punishment to control their administrative subordinates in thirteenth-century England. Bishops had few effective avenues available to them for disciplining their clerks and rarely pursued them, preferring to secure their service and loyalty through rewards. The chief reward was the benefice, often granted for life. Episcopal administrators' security of tenure in these benefices, however, made them free agents, allowing them to transfer from diocese to diocese or even leave administration altogether; they did not constitute a standing episcopal civil service. This tenuous bureaucratic relationship made the personal relationship between bishop and clerk more important. Ultimately, many bishops communicated in terms of friendship with their administrators, who responded with expressions of devotion. Michael Burger's study brings together ecclesiastical, social, legal, and cultural history, producing the first synoptic study of thirteenth-century English diocesan administration in decades. His research provides an ecclesiastical counterpoint to numerous studies of bastard feudalism in secular contexts. The Literary Churchman, 1860
