Our organisms manufacture antibodies continuously to deal with the various environmental challenges. Among others, when foreign and/or self proteins/peptides contribute to the body's health, they become antigens. Antibody cell identification, pathogenesis of disease and immunologic tests: a complex but fascinating process that will be discussed in this lecture. Here, we will introduce the classification of blood types.

Model 1 – Red Blood Cells and Antibodies

	Person with Blood Type A	Person with Blood Type B	Person with Blood Type AB	Person with Blood Type O
