

AP Human Geography
Unit 1: Geography (Its Nature and Perspectives)
Vocabulary and Concepts
Chapter 1 in textbook (pages 1-33) and Appendix A (A1-9)

1. human geography (8): focuses on how people make places, how we organize space and society, how we interact with each other in places and across space, and how we make sense of others and ourselves in our locality, region, and world.
2. globalization (8): a set of processes that are increasing interactions, deepening, relationships, and heightening interdependence without regard to country borders.
3. spatial perspective (11): observing variations in geographic phenomena across space; used to study a multitude of phenomena ranging from political elections and urban shantytowns to gay neighborhoods and folk music.
4. location (11): the position of people and things on Earth
 - a. location theory (11): predicts the why and where of people and things
 - b. absolute location (14): uses latitude and longitude
 - c. relative location (15): describes a place in relation to other humans or physical features; constantly changing
 - d. site: initial, physical characteristics of a place
 - e. situation: location of a place in relation to surrounding characteristics
5. human-environment interactions (11): relationship between humans and the physical world and the results of those relationships
6. place (11): the unique human and physical characteristics associated with a place
 - a. sense of place (11): we infuse what a place means to us by our own experiences
 - b. perception of place (11): books/movies/stereotypes give us ideas about a place even if we have never been there (i.e. images of the Swiss Alps)
7. movement (11): the mobility of goods, people, and ideas; spatial interaction is determined by distances among places, their accessibility and connectivity
 - a. complementary: exchanging goods between regions that satisfy each other's demands
 - b. intervening opportunity: the presence of a nearer community that greatly diminishes the attractiveness of sites farther away (instead of visiting China, visit Chinatown in NY)
8. landscape (11): the material character of a place, the complex of natural features, human structures, and other tangible objects that give a particular place form
 - a. cultural landscape (12): visible imprint of human activity on the landscape identified by Carl Sauer
 - b. sequent occupance (12): the successive occupiers of a landscape that bring their own technological and cultural traditions; proposed by Derwent Whittiesey (new inhabitants to a neighbor land)
9. maps:
 - a. distortion: fundamental problem with maps
 - i. equal-area projection maps: attempt to maintain the relative spatial science and the areas on the map; may distort the actual shape of polygons
 - ii. conformal maps: attempt to maintain the shape of polygons on a map; may distort the relative area from one part of the map to another
 - b. scale (G/A-1): the ratio between an actual distance and distance shown on a map
 - c. cylindrical projection maps: are true in direction and good for navigation but exaggerates the size and shape of higher-altitude areas and areas along the equator are true
 - d. planar projection maps: examine the Earth in one direction such as using a pole or polar region so that you see the parallel as circles; distortion increases as you move away from the center point of projection
 - e. conic projection maps: puts a cone over the Earth to keep distance in
 - f. oval projection maps: uses a combination of cylindrical and conic projections such as the Mollweide projection. It is good for showing data distribution; all parallels are true, but the greatest distortion is at the poles.
 - g. reference maps (14): show locations; uses latitude and longitude (i.e. GPS)
 - h. thematic maps (14): tell stories (often use colors, distortions, and sizes to tell stories)
 - i. cartograms: chart and assign data by size so they distort on a map

investments and financialization Environmental challenges are addressed in chapters on resource economies vulnerability of regions to climate change carbon markets and energy transitions Distribution and consumption feature alongside more established topics on the firm innovation and work The handbook also captures the theoretical and conceptual innovations of the last fifteen years including evolutionary economic geography and the global production networks approach Addressing the dangers of inequality instability and environmental crisis head on the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future Progress in International Law Miller, Rebecca M. Bratspies, 2008-06-30 Progress in International Law is a comprehensive accounting of international law for our times Forty leading international law theorists analyze the most significant current issues in international law and their critical assessments draw diverse conclusions about the current state and future prospects of international law The material is grouped under the headings The History and Theory of International Law The Sources of International Law and Their Application in the United States International Actors International Jurisdiction and International Jurisprudence The Use of Force and the World's Peace and The Challenge of Protecting the Environment and Human Rights The book draws its inspiration from a similar survey undertaken in 1932 by Harvard Law Professor and PCIJ Judge Manley O Hudson In his book Progress in International Organization Hudson sought to demonstrate that what he perceived as an emerging international infrastructure and as moves toward the rule of law in international affairs were sure signs of human progress towards peace and cooperation Progress in International Law critically engages with that claim as a normative matter and at the same time presents the evidence by which a judgment about our own progress towards peace and cooperation might be judged

Proceedings of the American Society of International Law at Its ...annual Meeting American Society of International Law, 2009 **Geographies of Peace and Armed Conflict** Audrey Kobayashi, 2013-09-13 This collection addresses the impact of armed conflict and explores pathways to peace across the world Topics range from geopolitics to the effects of armed conflict on the environment resources health children and transnational migration Others explore the social processes involved in post conflict situations and others still the lessons for achieving effective peace The geographical concepts addressed include the notion of conflict space landscapes of terror the relationship between violence and justice the conditions for peace and the dynamics of post conflict Methods include landscape analysis interviews with a range of citizens mapping and geographic information science and policy analysis Several papers address the situation of children in conflict zones the impact of conflict on patterns of migration the role of gender in achieving peace the concept of territory as a basis for conflict and for negotiation of peace as well as the economic impact of conflict The studies cover several world regions including Africa the Middle East South and Southeast Asia and eastern Europe This book was originally published as a special issue of Annals of the Association of American Geographers **Global Environmental Issues** Frances Harris, 2012-01-30 Global Environmental Issues second edition builds on the popularity of the first edition viewing global

environmental problems as complex issues with a network of causes influenced by a range of actors with differing priorities. The book recognises that science underpins much of what happens in society and therefore it is important to be able to interpret the environmental and social consequences of scientific developments. In addition to discussing the main biophysical causes, the book illustrates how socio-economic and political factors determine why and how people use land resources and technology and how this in turn affects natural resource management. This edition includes new chapters on the politics of science, International environmental regulation and treaties, environmental issues in a globalised world and natural resource management. **Global Environmental Issues** second edition is essential reading for upper level undergraduates and Masters students within departments of Environmental Science and Geography. Includes case studies from around the world to provide a real life context for the issues tackled in each chapter. Considers both the results of human actions and natural environmental change in order to provide balanced in depth debate. Includes coverage of contemporary hot topics such as biodiversity, globalization and sustainable development. Chapters authored by experts in the field. Includes new chapters on The politics of science, International environmental regulation and treaties, Environmental issues in a globalised world and Natural Resource Management. Expanded sections include negotiating multilateral environmental agreements, GM crops, biofuels and marine and freshwater resources.

Research Ethics for Social Scientists Mark Israel, Iain Hay, 2006-06-15 This is an excellent book which can be recommended both to the professional ethicist seeking to situate research ethics for a social scientific audience and to social scientists seeking an overview of the current ethical landscape of their discipline. Research Ethics Review Ethics is becoming an increasingly prominent issue for all researchers across the western world. This comprehensive and accessible guide introduces students to the field and encourages knowledge of research ethics in practice. Research Ethics for Social Scientists sets out to do four things. The first is to demonstrate the practical value of thinking seriously and systematically about what constitutes ethical conduct in social science research. Secondly, the text identifies how and why current regulatory regimes have emerged. Thirdly, it seeks to reveal those practices that have contributed to the adversarial relationships between researchers and regulators. Finally, the book hopes to encourage both parties to develop shared solutions to ethical and regulatory problems. Research Ethics for Social Scientists is an excellent introductory text for students as it introduces students to ethical theory and philosophy, provides practical guidance on what ethical theory means for research practice, provides case studies to give real examples of ethics in research action. The result is an informative, accessible and practical guide to research ethics for any student or researcher in the social sciences.

Global Problems, Smart Solutions Bjørn Lomborg, 2013-11-14 Every four years since 2004 the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra 75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for

investment discussing how to combat problems ranging from armed conflicts corruption and trade barriers to natural disasters hunger education and climate change For each case Alternative Perspectives are also included to provide a critique and make other suggestions for investment In addition a panel of senior economists including four Nobel Laureates rank the attractiveness of each policy proposal in terms of its anticipated cost benefit ratio This thought provoking book opens up debate encouraging readers to come up with their own rankings and decide which solutions are smarter than others

Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

Emplaced Resistance in

Palestine and Israel Marion Lecoquierre, 2021-11-18 The Israeli Palestinian conflict gravitates constantly around the question of territorial control due to the settler colonial principle present at the core of the Zionist project Acknowledging space as a central tool of domination used by the Israeli authorities this volume sheds light on the way space can become both a resource for and an outcome of protest with an emphasis placed on the way it is used and produced through practices of resistance by subaltern groups The research relies on a comparative approach relying on data collected in the course of fieldwork conducted between 2012 and 2015 in Palestine and Israel It focuses on three sites of contention which include the H2 area in Hebron the occupied Old City under Israeli authority the core neighbourhoods of Silwan Wadi Hilwe and al Bustan and the unrecognized Bedouin village of al Araqib in the Negev desert Through these three case studies the book tackles different strategies that engage with the materiality of space place sense of place territory landscape network and scale showing the mobilization of a real spatial repertoire of contention The different regimes of control give rise to strategies that are first and foremost emplaced i e rooted in the local Providing an original comparison between flashpoints of the Palestinian resistance against the Israeli politics of dispossession and expulsion the book is a key resource for scholars and readers interested in political geography political science sociology and the Israel Palestine conflict **Light and Shadow**

Michael L. Galaty, Ols Lefe, Wayne E. Lee, Zamir Tafilica, 2013-12-31 Employing survey archaeology excavation ethnographic study and multinational archival work the Shala Valley Project uncovered the many powerful creative ways whereby the men and women of Shala shaped their world through dynamic world systemic relationships with the powers that surrounded but never fully conquered them The Shala Valley Project presents the highlanders the malesore in the full complexity of their lives while also unveiling a new deeper history for the region a history that reaches back to an unexpected fortified Iron Age site Light and Shadow tells many stories Archaeologists historians and students of tribes of empires of imperial indigenous relations of blood feud of kinship of the built landscape of world systems theory and sustainability science and more will find much here to digest The people of Shala to which Light and Shadow is dedicated may serve as an example in our modern age one in which persistent tribal peoples still fight for their survival and seek to preserve some degree of independence from capitalist economies bent on their incorporation **Eco-Homes**

Doctor Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate

change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us
