

Non-infectious diseases are not caused by pathogens. They are not spread between people.

### Coronary Heart Disease (CHD)

This is a type of heart disease where the problem is a restricted flow of blood to the cardiac muscle through the cardiac arteries. Remember, there are many other types of heart disease.

#### Atherosclerosis

The lining of a healthy artery is smooth, this means blood can easily flow through it. If the smooth endothelium becomes damaged (perhaps by high blood pressures), a fatty plaque or **atheroma** can build up in the wall, this restricts blood flow through the arteries.

**Phagocytic cells** migrate to the damaged area and start to accumulate lipids becoming **foam cells**. Fatty deposits build up underneath the damaged endothelium. Smooth muscle cells in the artery lining divide to form **fibrous connective tissue** to repair the damage. Tissue and fatty deposits build up in the area slowly over many years. The growing **plaque** narrows the **lumen** of the artery. Eventually the plaque breaks through the endothelium which becomes roughened. A blood clot (**thrombus**) starts to form, this makes the lumen even narrower.

If the blood clot grows too large it may block the artery or a piece of clot may break off – this is an **embolus**. The embolus travels in the blood until it gets to a place where the artery is too narrow for it to pass (possibly somewhere where there is already an atheroma).

If the **coronary artery** becomes blocked in one of these ways a heart attack or **myocardial infarction (MI)** may occur. Coronary arteries supply heart muscle with glucose and oxygen, blockage of the coronary artery means some heart muscle may die – this is an **MI**.

#### Angina

When the coronary arteries become narrowed by atheroma less blood can pass through them to supply the heart muscle. Problems can occur when exercising as the heart muscle needs more glucose and oxygen for faster respiration, unfortunately, the coronary artery is too narrow to supply these. This can result in a pain called **angina pectoris**.
