The Australian Immunisation Handbook provides clinical advice for health professionals on the safest and most effective use of vaccines in their practice. These recommendations are developed by [Australian Technical Advisory Group on Immunisation \(ATAGI\)](#) and approved by the [National Health and Medical Research Council \(NHMRC\)](#).

The Handbook's clinical recommendations are based on the best scientific evidence available at the time of publication from published and unpublished literature. Where specific scientific evidence was unavailable, recommendations were formulated using the best available expert opinion relevant to Australia.

In some instances, the ATAGI recommendations differ from vaccine product information sheets (PI). These differences are detailed in the relevant vaccine chapters under the heading 'Variations from product information'. Where a variation exists, the ATAGI recommendation should be considered best practice.
