Implementation Pressman And Wildavsky:

Implementation Jeffrey L. Pressman, Aaron Wildavsky, 1984-06-05 This book confronts the widespread impression that policy or program implementation should be easy arguing instead that implementation even under the best of circumstances is exceedingly difficult Using the Oakland Project as a case study this book discusses each stage of the process of implementation demonstrating that completion of what might seem to be a simple sequence of events will in fact depend on a complex chain of reciprocal interactions Each part of the chain must be built with the others in view so the separation of policy design from implementation is fatal The first four chapters illustrate the movement from simplicity to complexity Chapter 5 discusses the number of decision points throughout the process giving an indication of the magnitude of the task Chapter 6 examines why project targets may be set even if they are unlikely to be met considering both the position of those who set targets top federal officials who wish large accomplishments from small resources in a short time and those who must implement them career bureaucrats and local participants characterized by high needs and low cohesion The last chapter discusses the relationship between the evaluation of programs and the study of their implementation arguing that tendencies to assimilate the two should be resisted *Implementation* Jeffrey L. The Theory of Environmental Agreements and Taxes Martin Enevoldsen, 2005-01-01 Martin Enevoldsen's book is a pioneering work that compares the impacts of various non regulatory environmental strategies in achieving measurable pollution reductions Much has been written on the theoretical virtues and drawbacks of green taxation versus the adoption of voluntary agreements when it comes to effective implementation of environmental goals In convincing detail this book makes the case for the effectiveness of environmental taxation its barriers being primarily political in nature rather than economic Green taxes are highly controversial even in the most environmentally conscious nations particularly when they are regarded as a purely fiscal instrument The successful Danish CO2 taxation on industry which this study proves to be much more effective than the Dutch system of voluntary agreements or the Austrian laissez faire policies relied not only on the inducement of the CO2 tax itself all of the tax revenue was ploughed back into industry as subsidies for investments in advanced energy saving technologies Martin Enevoldsen's book is simply a must for political scientists environmental economists and environment policymakers Svend Auken M P and former Danish Minister for Environment and Energy Although there is a huge demand for accurate analysis of environmental policy outcomes in both the academic and policy making communities there is currently very little theoretical research on this issue This ambitious book redresses the balance by constructing a new theoretical framework at the crossroads between economics and political science to account for the effectiveness of environmental governance Drawing on insights from new institutional economics environmental economics collective action theory and social capital theory the author analyses how policy outcomes are influenced by institutional factors that constrain and empower the target groups of environmental regulation

Clientelism and Implementing Social Security Programmes in Post-conflict Iraqi Kurdistan Region Muslih Irwani,2015-10-19 Clientelism and Implementing Social Security Programmes in Post conflict Iraqi Kurdistan Region investigates social policy in a politically less developed entity and examines the mainstream top down and bottom up models of policy implementation in light of a detailed study of the Kurdistan Regional Government In addition it introduces the innovative clientelistic model of policy implementation a political and preferential tool which utilises a public nationalistic dichotomy in social welfare provision The book argues that politicians in the Kurdistan region deal with social policy programmes according to their political preferences attaching importance to policies on the basis of the way they feel about those social programmes and interest groups concerned As such as it stands policy implementation is subject to interference by politicians and high government officials under the pretext of supporting and monitoring the way such policy is implemented Through an investigation of the most prominent actors in the implementation of social security programmes this book demonstrates how beneficiaries of these programmes can themselves become focal points in the implementation process Indeed within the Kurdistan Regional Government s social policy context today the benefits of social security schemes are being distributed based on the socio political status of recipients not on their socio economic conditions and needs

Peter Triantafillou, 2017-05-15 This book examines the links between major contemporary public sector reforms and neoliberal thinking. The key contribution of the book is to enhance our understanding of contemporary neoliberalism as it plays out in the public administration and to provide a critical analysis of generally overlooked aspects of administrative power. The book examines the quest for accountability, credibility and evidence in the public sector. It asks whether this quest may be understood in terms of neoliberal thinking and if so how. The book makes the argument that while current administrative reforms are informed by several distinct political rationalities, they evolve above all around a particular form of neoliberalism: constructivist neoliberalism. The book analyses the dangers of the kinds of administrative power seeking to invoke the self-steering capacities of society and administration itself.
