Republic of Estonia International Monetary Fund. European Dept.,2020-01-22 This Selected Issues paper on Estonia examines impact of assessing competitiveness and exposure to shocks integrating global value chains GVCs This paper strengthens the analytical underpinnings of competitiveness assessments and exposure to shocks by incorporating GVCs Standard real effective exchange rates REER indexes assume trade is only in final goods However like most European economies Estonia is highly integrated into GVCs This implies that assessments of competitiveness should consider trade in value added Based on a structural model the paper assesses competitiveness and exposure to trade shocks accounting for the GVC participation in Estonia The analysis using a REER index considering the GVC architecture suggests potential competitiveness problems in Estonia The paper also estimates the impact of overvaluation and appreciation of the GVC related REER measure on value added export and real GDP growth and finds observable effects Further trade tension induced tariff hikes may have important costs for value added produced in Estonia

Republic of Latvia International Monetary Fund. European Dept.,2019-08-07 This Selected Issues paper analyses the implications of global value chains GVC participation for Latvia s competitiveness and exposure to risks Using a structural model it assesses Latvia s competitiveness through different real effective exchange rate REER measures and examines the main factors behind differences in the measures Based on this analysis the paper suggests policy options to strengthen Latvia s competitiveness The paper also estimates the impact of an appreciation of the GVC related REER measure on value added export growth and real GDP growth and finds sizable effects suggesting that a rapid labor market tightening could lead to erosion in competitiveness and reduction in growth Finally trade tension induced tariff hikes may have significant cost for Latvia especially in terms of value added produced in the country Trade tension induced tariff hikes are likely to have moderate costs for Latvia in terms of value added produced in the country In this regard policies aimed at enhancing product sophistication or quality and export market diversification could mitigate Latvia s exposure to trade shocks in GVCs
