The Birds That Audubon Missed Kenn Kaufman, 2025-05-20 Renowned naturalist Kenn Kaufman examines the scientific discoveries of John James Audubon and his artistic and ornithologist peers in this fascinating blend of history science art biography and memoir Booklist starred review that is a bird lovers delight Kirkus Reviews Raging ambition Towering egos Competition under a veneer of courtesy Heroic effort combined with plagiarism theft exaggeration and fraud This was the state of bird study in eastern North America during the early 1800s as a handful of intrepid men raced to find the last few birds that were still unknown to science The most famous name in the bird world was John James Audubon who painted spectacular portraits of birds But although his images were beautiful creating great art was not his main goal Instead he aimed to illustrate and write about as many different species as possible obsessed with trying to outdo

his rival Alexander Wilson George Ord a fan and protégé of Wilson held a bitter grudge against Audubon for years claiming he had faked much of his information and his scientific claims A few of Audubon's birds were pure fiction and some of his writing was invented or plagiarized Other naturalists of the era including Charles Bonaparte nephew of Napoleon John Townsend and Thomas Nuttall also became entangled in the scientific derby as they stumbled toward an understanding of the natural world an endeavor that continues to this day Despite this intense competition a few species including some surprisingly common songbirds hawks sandpipers and more managed to evade discovery for years Here renowned bird expert and artist Kenn Kaufman explores this period in history from a new angle by considering the birds these people discovered and especially the ones they missed Kaufman has created portraits of the birds that Audubon never saw attempting to paint them in that artist's own stunning style showing how our understanding of birds continues to gain clarity even as some mysteries persist from Audubon's time until ours

More Than Birds Val Shushkewich,2012-11-17 Once people encounter the natural world and become aware of its intricacy fragility beauty and significance they will recognize the need for conservation The fascinating development of natural history studies in North America is portrayed through the life stories of 22 naturalists The 19th century saw early North American naturalists such as Alexander Wilson the Father of American Ornithology John James Audubon and Thomas Nuttall describing and illustrating the spectacular flora and fauna they found in the New World Scientists of the Smithsonian Institution and the Canadian Museum of Nature worked feverishly to describe and catalogue the species that exist on the

continent Great nature writers such as Florence Merriam Bailey Cordelia Stanwood Margaret Morse Nice Louise de Kiriline Lawrence and Roger Tory Peterson wrote in depth about the lives and behaviours of birds Early conservationists such as Jack Miner the Father of Conservation created nature preserves Today noted naturalists such as Robert Nero Robert Bateman Kenn Kaufman and David Allen Sibley do everything they can to encourage people to experience nature directly in their lives and to care about its protection and preservation
