Smith, Hope Blecher, 2023-11-03 Write to Be Read is meant to inspire educators to be designers of engaging curriculum specifically targeting ways to improve the teaching of writing in schools today Students tend to write in response to literature whereas the focus of this resource is to help students write material fiction and non fiction that they want to read Students often engage in writing that is more about pleasing the teacher or ticking a homework or assignment box This book challenges many assumptions with reference to traditional models for teaching writing A rich assortment of engaging examples are presented in this book to prompt educators to adapt and construct their own meaningful writing units of study **The Power of Story** Joan Wink Ph.D., 2017-11-07 Through this book readers will discover that stories can move the human heart and head in ways that research cannot Stories bring together readers writers librarians teachers students and families in the libraries of today and will continue to do so tomorrow Written for all those lovers of literacy this book links libraries and literacies through the power of stories The book is not filled with data in the form of pie charts graphs and tables Rather the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries The author s primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all The book begins by presenting anecdotes and the author s personal story to lay the foundation for what literacies are and what literacy is not An activity Spiral of Literacy allows readers to reflect on their own literacies Chapters that follow each begin with a story that sets the theoretical foundation Each chapter concludes with an action section that demonstrates how to turn theory to practice whether you are in a library a classroom or at home A final chapter envisions what libraries might look like in 10 years through interviews with librarians teachers and others interested in literacy *Designs for Improving Student Learning: Investigating Instructional Regimes* Jenny G. DeMonte, 2008 **A Guide to Developing Communication Across the Curriculum** Beatrice A. Furner, 1989 **What Is Wrong With Our Schools? The ideology impoverishing education in America and how we can do better for our students** Daniel Buck, 2022-12-09 What is wrong with our schools is the question everyone seems to be asking or more like screaming nowadays Standard answers point to everything from school funding to unions to bureaucracies and more In this book Daniel Buck provides a different answer flawed ideas ideas about instruction curriculum even human nature itself are the root cause

of American schooling's dysfunction Touching on philosophy contemporary educational studies cognitive science and his own experience in the classroom Buck argues that so long as we build our system on incorrect first principles all other reforms are for naught In place of the progressive education that pervades our schools Buck argues for a traditionalist approach classic literature direct instruction sequenced curricula clear rules and consequences as the education we need for the future
