Finding Sufficiency Breastfeeding With Insufficient Glandular Tissue:

Finding Sufficiency Diana Cassar-Uhl, 2014-07-22 Breastfeeding difficulty due to insufficient glandular tissue is something many mothers struggle with. Because this condition is still largely under researched and misunderstood by practitioners who work with mothers during the perinatal period, women who experience breastfeeding problems due to insufficient glandular development also struggle to find support both clinical and emotional in dealing with them. This book aims to inform and support the efforts of breastfeeding mothers with low milk production due to insufficient glandular tissue from both a scientific standpoint and an emotional one, covering the unique decisions and feelings that may be faced by someone who fully intended to breastfeed but felt betrayed by her body. The book also provides guidance for practitioners who seek to understand this condition and support their patients/clients who are dealing with it. *Core Curriculum for Interdisciplinary Lactation Care* Lactation Education Accreditation and Approval Review Committee (LEAARC), Lactation Education Accreditation and Approval Review Committee, Becky Spencer, Suzanne Hetzel Campbell, 2022-09-29 *Core Curriculum for Interdisciplinary Lactation Care* continues to be a trustworthy source for lactation specific information and education in a thoroughly updated second edition. Published in association with the Lactation Education Accreditation and Approval Review Committee (LEAARC), it presents the core curriculum required to practice as a beginning lactation consultant in an easy-to-read format. Written by an interdisciplinary team of clinical lactation experts, it reflects the current state of practice and offers evidence-based information regardless of discipline or specialty. The updated Second Edition includes new information on scientific evidence supporting breastfeeding, the biochemistry of human milk, breastfeeding multiples or a preterm infant, lactation and maternal mental health, breast pathology, and more. *Breastfeeding Doesn't Need to Suck* Kathleen Kendall-Tackett, 2022-06-28 2023 Prose Award Finalist *Breastfeeding Doesn't Need to Suck* shows mothers how to navigate their breastfeeding journey while also caring for their mental health. *Breastfeeding Doesn't Need to Suck* contains information that you will not find in other breastfeeding books, such as a thorough discussion of breastfeeding's impact on sleep, safe and unsafe bedsharing, and how where babies sleep impacts their mothers' mental health. This book describes what effective help looks like and gives specific suggestions for partners, grandmothers, and friends who want to help. Mothers will also learn how to navigate healthcare systems that can often undermine breastfeeding and mental health. Postpartum is hard, no matter how you feed your baby. Yet formula companies tell mothers that all of their problems will be solved if only they would switch. It's not true; these issues will still be there even if mothers stop breastfeeding. These are the five I's of new motherhood: idleness, isolation, incompetence, identity, and intensity. If mothers are unprepared for these feelings, they can undermine both her breastfeeding and her mental health. *Breastfeeding Doesn't Need to Suck* provides information on common breastfeeding problems, such as nipple pain and low milk supply, while also keeping mothers' mental health in mind. Breastfeeding, when it's going well, protects mothers' mental health. Conversely, breastfeeding problems increase the risk of

depression and anxiety Dr Kathleen Kendall Tackett is both a psychologist and an International Board Certified Lactation Consultant with more than 30 years experience in both lactation and mental health Breastfeeding Doesn't Need to Suck is an evidence based guide full of practical advice with the goal of helping mothers and babies navigate postpartum and come through it happy healthy and securely attached
