Lynn Weiss, 2008-08-18 After the Second World War Gertrude Stein asked a friend s support in securing a visa for Richard Wright to visit Paris I ve got to help him she said You see we are both members of a minority group The brief little noted friendship of Stein and Wright began in 1945 with a letter

Over the next fifteen months the two kept up a lively correspondence which culminated in Wright's visit to Paris in May 1946 and ended with Stein's death a few months later. Gertrude Stein and Richard Wright began their careers as marginals within marginalized groups and their desire to live peacefully in unorthodox marriages led them away from America and into permanent exile in France. Still the obvious differences between them in class, ethnic and racial origins and in artistic expression beg the question: What was there to talk about? This question opens a window onto each writer's meditations on the influence of racial, ethnic, national origins on the formation of identity in a modern and post-modern world. The intuitive and intellectual affinities between Stein and Wright are illuminated in several works of non-fiction. Stein's *Paris, France* and Wright's *Pagan Spain* are meditations on expatriation and creativity. Their so-called homecoming narratives, Stein's *Everybody's Autobiography* and Wright's *Black Power*, examine concepts of racial and national identity in a post-modernist world. Respectively in *Lectures in America* and *White Man, Listen!*, Stein and Wright outline the ways in which the poetics and politics of modernism are inextricably bound. At the close of the twentieth century the meditations of Stein and Wright on the protean quality of individual identity and its artistic, social and political expression explore the most prescient and pressing issues of our time and beyond.

M. Lynn Weiss is an assistant professor of English and African American literature at Washington University.

Beaten Down, Worked Up Steven Greenhouse, 2019-08-06. A page-turning book that spans a century of worker strikes. Engrossing, character-driven panoramic. *The New York Times Book Review*. We live in an era of soaring

corporate profits and anemic wage gains one in which low paid jobs and blighted blue collar communities have become a common feature of our nation's landscape. Behind these trends lies a little discussed problem: the decades long decline in worker power. Award winning journalist and author Steven Greenhouse guides us through the key episodes and trends in history that are essential to understanding some of our nation's most pressing problems including increased income inequality, declining social mobility and the concentration of political power in the hands of the wealthy few. He exposes the modern labor landscape with the stories of dozens of American workers from GM employees to Uber drivers to underpaid schoolteachers. Their fight to take power back is crucial for America's future and Greenhouse proposes concrete, feasible ways in which workers' collective power can be and is being rekindled and reimagined in the twenty first century. *Beaten Down, Worked Up* is a stirring and essential look at labor in America poised as it is between the tumultuous struggles of the past and the vital, hopeful struggles ahead. A PBS NewsHour Now Read This Book Club Pick. *Transition in Power* Peter J. Hugill, 2018-08-15. Hegemonic transitions are never clear and they usually emerge from a period of multi-polarity in the world system. Two types of state tend to contend for power: trading states and territorial states, although most states are never pure and tend to contain within them multiple polities with different agendas. This book describes the hegemonic transition between two major trading states, Britain and America. British decline began in the late Victorian era, but the transition to American power was slow and other states also sought hegemony. Transitions between trading states focus on economic struggle, though struggles between trading and territorial states and between territorial states are marked by armed conflict. In 1919, President Woodrow Wilson saw three arenas of competition developing between Britain and America in international transportation, international communication, and petroleum. But Britain was challenged economically by America as early as 1861 via the Morrill Tariff; her economic hegemony was gone by the 1880s and she was defeated by 1947. From the 1880s on, both America and Germany sought to replace Britain as hegemonic power, not only through their implementation of protectionist economic policies but also through the adoption of revised versions of the world economy through new technologies and in the case of Germany, military power. Britain struggled to stay in place. Britain's world economy was that of a pure trading state. Maritime trade in organic materials was organized through global capitalism and control over submarine cable telecommunications rather than territorial possession. America's rise was greatly helped by being a capitalist power in possession of a secure territorial base in the mid-section of the North American continent, but America suffered from multiple polities competing for power with the South, particularly problematic. Germany developed a radically new world economy that synthesized resources using organic chemistry. German science and technology began to diffuse to American corporate laboratories before World War One. After that war, diffusion to American laboratories and universities was massive and helped secure American hegemony. *Congressional Record* United States. Congress, 1924. **"Twice the Thrills!
