Sand, Snow, and Stardust Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country's status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon Sand Snow and Stardust explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America's planetary power Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology From General George S Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments Even decades after the first manned space flight plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth An entertaining survey of the relationship between environmental history and military might Sand Snow and Stardust also serves as a warning about the further transformation of the planet whether through desertification melting ice caps or attempts to escape it entirely

Earned Citizenship Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority

of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

The Middle and Upper Paleolithic Archeology of the Levant and Beyond Yoshihiro Nishiaki,Takeru Akazawa,2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia

Anthropogenic Disturbances in the Deep Sea Ricardo Serrão Santos, Christopher Kim Pham, Jeroen Ingels, 2020-01-15

Bounded Rationality and Economic Diplomacy Lauge N. Skovgaard Poulsen, 2015-08-21

Modern investment treaties give private arbitrators power to determine whether governments should pay compensation to foreign investors for a wide range of sovereign acts In recent years particularly developing countries have incurred significant liabilities from investment treaty arbitration which begs the question why they signed the treaties in the first place Through a comprehensive and timely analysis this book shows that governments in developing countries typically overestimated the economic benefits of investment treaties and practically ignored their risks Rooted in insights on bounded rationality from behavioural psychology and economics the analysis highlights how policy makers often relied on inferential shortcuts when assessing the implications of the treaties which resulted in systematic deviations from fully rational behaviour This not only sheds new light on one of the most controversial legal regimes underwriting economic globalization but also provides a novel theoretical account of the often irrational yet predictable nature of economic diplomacy

In the Shadow of Kinzua Laurence M. Hauptman, 2014-01-22

The Kinzua Dam has cast a long shadow on Seneca life since World War II The project formally dedicated in 1966 broke the Treaty of Canandaigua of 1794 flooded approximately 10 000 acres of Seneca lands in New York and Pennsylvania and forced the relocation of hundreds of tribal members Hauptman offers both a policy study detailing how and why Washington Harrisburg and Albany came up with the idea to build the dam and a community study of the Seneca Nation in the postwar era Although the dam was presented to the Senecas as a flood control project Hauptman persuasively argues that the primary reasons were the push for private hydroelectric development in Pennsylvania and state transportation and park development in New York This important investigation based on forty years of archival research as well as on numerous interviews with Senecas shows that these historically resilient Native peoples adapted in the face of this disaster Unlike previous studies *In the Shadow of Kinzua* highlights the federated nature of Seneca Nation government one held together in spite of great diversity of opinions and intense politics In the Kinzua crisis and its aftermath several Senecas stood out for their heroism and devotion to rebuilding their nation for tribal survival They left legacies in many areas including two community centers a modern health delivery system two libraries and a museum Money allocated in a compensation bill passed by Congress in 1964 produced a generation of college educated Senecas some of whom now work in tribal government making major contributions to the Nation s present and future Facing impossible odds and hidden forces they motivated a cadre of volunteers to help rebuild devastated lands Although their strategies did not stop

the dam s construction they laid the groundwork for a tribal governing structure and for managing other issues that followed from the 1980s to the present including land claims litigation and casinos

Defence Planning and Uncertainty Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future
