Textbooks and Educational Media: Perspectives from Subject Education Péter Bagoly-Simó, Zuzana Sikorová, 2021-08-05

This book brings together empirical research and conceptual work on textbooks and education media from 13 countries and 17 disciplines. Along with textbook production usage and development, it also explores the interconnectedness of educational policy and teaching and learning materials. Further, the book offers insights into regional and local discourses, e.g., specific theories of Portuguese and Spanish speaking countries as well as Nordic countries, contrasting their theories with international literature practices and solutions with regard to teaching selected subjects at the pre-primary, primary, secondary, and tertiary level. This book also discusses the specific combinations of subjects, e.g., Physics, Biology, Geography, Swedish, English, and their subject-specific education, e.g., Physics Education or Didactics. Lastly, it examines the work of a number of early career researchers, giving them a voice and bringing in fresh ideas currently being developed in various countries around the globe. This proceedings volume will appeal to publishers, subject educators in primary, secondary, and tertiary education, and academic researchers from the fields of textbooks, educational media, and subject-specific education. Its international authorship and explicit focus on subject-specific particularities of educational media provide a unique and comprehensive overview.

Social Studies for Young Children Gayle Mindes, Mark Newman, 2021-08-30 This book anchors the social studies as the central unifying force for young children. Teachers use the inquiry process to foster child development of social skills and citizenship ideals in their first classroom experiences. Curriculum is built starting with children's natural curiosity to foster literacy in all its forms: speaking, listening, reading, writing. Along the way, young children acquire knowledge and academic skills in civics, economics, geography, and history. Shown throughout are ways to promote social learning, self-concept development, social skills, and citizenship behaviors. Featured here are individually appropriate and culturally relevant developmental practices. Considered are the importance of family collaboration and funds of knowledge children bring to early care and education. Contributors to this edition bring expertise from bilingual early education, literacy, special education, and the social studies. Beginning with citizenship and community building, the authors consider all aspects of teaching young children, leading to a progression of capacity to engage civically in school and community.

Citizenship Education around the World John Petrovic, Aaron Kuntz, 2014-04-24 Though certainly not a new idea, citizenship education manifests in unique and often unpredictable ways in our contemporary neoliberal era. The question of what it means to be a productive and recognized citizen must now be understood simultaneously along both global and local lines. This edited volume offers an international perspective on citizenship education enacted in specific socio-political contexts. Each chapter includes a pointed conceptualization of citizenship education, a philosophical framework that is then applied to specific national cases across Europe, Asia, Canada, and more. Chapters emphasize how such frameworks are implemented within local contexts, encouraging particular pedagogical/curricular practices even as they constrain others.

Chapters conclude with suggestions for productive change and how educators might usefully engage contemporary contexts through citizenship education
