

UNIT ONE

THE SCIENCE OF GEOGRAPHY

1.1 The meaning of Geography

Science is defined as a body of knowledge that is systematized, organized, experimented and verified. And Geography has almost all these characteristics. Hence, it is a science.

Ancient Greeks defined geography for the first time by combining two words “geo” and “graphic”

- Geo means earth and
- Graphic means writing.

Therefore, Geography is description of the earth. But, this definition seems general compared to the current scope of geography.

Note: the first person to define geography was Eratosthenes.

Geography has no single universally accepted definition. The commonly accepted one is” *the study of the spatial distribution of both physical and human made things and phenomena on the earth’s surface and two way interactions and interdependences between natural and human environments.*”

All definitions of geography emphasize that geography is a spatial science. In its modern context, spatial perspective is concerned with “where” and “why there” questions.

There are 5 pertinent questions about the phenomena they study. There are: 1. Where are things located?

2. Why are they located where they are?
