## Geography Memorandum Paper 1 November 2013:

Tigray: The Panarchy of War Mirjam Van Reisen, Munyaradzi Mawere, 2024-11-17 The Tigray War 2020-2022 left a deep and lasting impact not only on Tigray but also on the wider Horn of Africa. In this second book in a three-part series, the authors examine the devastation wrought by the war on Tigray's cultural heritage and identity. The deliberate destruction of ancient cultural sites and the assault on the Tigrayan people's identity have fueled a desire for greater autonomy among the people of Tigray to protect their future. Through the lens of Panarchy, this book explores how the war's effects extend far beyond Tigray, reshaping the dynamics of the entire region. Crucially, it uncovers Eritrea's secret role in the conflict, which was deliberately concealed by Ethiopia. Eritrean forces were implicated not only in atrocities but also in the use of particularly cruel and inhumane sexual violence intended to break the spirit of the Tigrayan people and erase Tigray as an ethnic and cultural group. This ethnographic research, conducted in collaboration with universities inside and outside Ethiopia, reveals the profound transformations caused by the war, with consequences that will reverberate for years to come. It sheds light on the war's long-term impact and highlights the urgent need for international attention on the challenges faced by Tigray and the wider region.

**A Global Idea** Mayssoun Sukarieh, 2023-08-15 A Global Idea outlines how youth, as shown by the Arab Spring uprisings and subsequent state responses, became a prominent social and political category during the first two decades of the twenty-first century in the Middle East. Drawing on ethnographic fieldwork, interview data, and textual analysis, Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex: a diverse transnational network of state, private sector, civil society, and international development aid organizations that worked through key urban areas such as Washington DC, Amman, and Dubai. In its analysis of the arrival, extension, and embedding of the youth development complex in the Middle East during this period, A Global Idea addresses a broader question that is of global and not just regional concern: How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere?

*Muslim Fashion* Reina Lewis, 2015-10-15 In the shops of London's Oxford Street, girls wear patterned scarves over their hair as they cluster around makeup counters. Alongside them, hip twenty-somethings style their head wraps in high black topknots to match their black boot-cut trousers. Participating in the world of popular mainstream fashion, often thought to be the domain of the West, these young Muslim women are part of an emergent cross-faith transnational youth subculture of modest fashion. In treating hijab and other forms of modest clothing as fashion, Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity. *Muslim Fashion* contextualizes modest wardrobe styling within Islamic and global consumer cultures, interviewing key players including designers, bloggers, shoppers, store clerks, and shop owners. Focusing on Britain, North America, and Turkey, Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion, identity, and

**Sticky Power** Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Although modern civilization revolves around money the nature of money is paradoxical It is nothing more than a representation of and medium for decentralized networks of social trust but its production is controlled by highly centralized networks of firms places and governments and there is never enough of it to go around Moreover given that the creation of money as credit is based on expectations money is at its heart an instrument for human agency to change the future However the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history Sticky Power seeks to deepen our understanding of the paradox of money by

introducing a novel conceptual lens Global Financial Networks to cast new light on the geography history politics and sociology of finance from the Middle Ages to the global financial crisis and beyond It shows that the power of finance is inherently sticky apparently new innovations such as offshore finance actually date back centuries and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly Haberly and W jcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance one less reactively focused on regulation and more proactively focused on building new institutional systems with a long term sticky power of their own      **Technological**

**Innovation in Legacy Sectors** William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don t head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system      *Islam and the Liberal State* Stephen H. Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about

Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening

*Ghosts of a Family* Edward Burke, 2024-09-19 At 1 20 a m on 24 March 1922 five men four dressed in British police uniforms broke into the North Belfast house of Owen McMahon a well known Catholic publican They fatally shot McMahon four of his sons and Eddie McKinney an employee of the family Nobody was ever charged for these ruthless and cold blooded murders In retaliation for these and other Belfast murders the IRA assassinated the former head of the British Army Field Marshal Sir Henry Wilson and a subsequent British ultimatum to the Irish government sparked the first salvos of the Irish Civil War days later The reluctance of the unionist Belfast government to pursue loyalist killers drove the rift between Northern Ireland s two main communities even deeper laying the foundations for the Troubles at the end of the twentieth century Over 100 years later Edward Burke has expertly uncovered the identity of the McMahons likely murderer This is a riveting cold case investigation that invokes the smoke filled streets of Belfast during the cataclysmic violence of 1920 22 and explores how the ramifications of the McMahon killings are still being felt to this day

**Democracy and the Vote in British Politics, 1848-1867** Dr Robert Saunders, 2013-07-28 The Second Reform Act passed in 1867 created a million new voters doubling the electorate and propelling the British state into the age of mass politics It marked the end of a twenty year struggle for the working class vote in which seven different governments had promised change Yet the standard works on 1867 are more than forty years old and no study has ever been published of reform in prior decades This study provides the first analysis of the subject from 1848 to 1867 ranging from the demise of Chartism to the passage of the Second Reform Act

Recapturing the vibrancy of the issue and its place at the heart of Victorian political culture it focuses not only on the reform debate itself but on a whole series of related controversies including the growth of trade unionism the impact of the 1848 revolutions and the discussion of French and American democracy Globalization, International Spillovers and Sectoral Changes Charlie Karlsson, Andreas P. Cornett, Tina Wallin, 2018-02-23 As a consequence of globalization news ideas and knowledge are moving quickly across national borders and generating international spillovers So too however are economic and financial crises Combining a variety of methods concepts and interdisciplinary approaches this book provides an in depth examination of these structural changes and their impact Assessing the implications of globalization for businesses and sectors chapters focus on the interdependencies between different economic and political layers and explore topics such as human capital creativity innovation networks and collaboration State against Civil Society Cameron Ross, 2017-10-02 Over the period December 2011 July 2013 a tidal wave of mass protests swept through the Russian capital and engulfed scores of cities and regions These demonstrations came as a great shock to the Russian political establishment After decades of passive acceptance of the status quo it appeared that civil society was at last awakening The protests came in the wake of the Arab Spring revolts which toppled authoritarian dictators in Tunisia Egypt and Libya However by the end of 2013 the number of mass protests in Russia and their size had declined precipitously President Putin on returning to office in 2012 had quickly regained the upper hand over the protestors This book examines the reasons for the rise and fall of the mass protests in the Russian Federation Internationally renowned experts in the field of Russian politics from Russia and the UK provide important new insights into the nature of the mass opposition movement the non systemic opposition its strengths and its weaknesses A key novel aspect of the study is its focus on the national and regional dimensions of the protest movement and its class and ethnic dimensions This book was published as a special issue of Europe Asia Studies **Earned Citizenship** Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country

contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

*Exclusion and Inclusion in International Migration: Power, Resistance and Identity* Armağan Teke Lloyd, 2019-04-30

People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this
