this case fish Politicians and managers use these projects and the models that justify them to rationalize fisheries in favor of modern technology and for capital and species efficiency Aimed at a diverse interdisciplinary fisheries management readership and designed as a guide to issues emerging in any assessment of ITQ the book is a timely investigation of the origins and diverse experiences of ITQ projects including resistance to them attempts to develop fisheries management around them and experiences of the risks that come with them Now around forty years old ITQ has never been subject to the kind of comprehensive sustainability assessments once advocated by Elinor Ostrom let alone the full cost accounting of impacts at the national level that Evelyn Pinkerton recently called for Fisheries Quota Management and Quota Transfer offers multi disciplinary assessments of the effects of ITQ from scholars working in eight countries The book brings together scholars from anthropology economics geography sociology the history of science and marine environmental history to discuss experiences from fisheries in eight industrialized countries It considers cases from outside as well as inside the EU including ITQ pioneers New Zealand and Iceland The combination allows for an unprecedented international perspective on stock assessments and share allocation systems By emphasizing emerging becoming learning and transforming through knowledge the book conceives technology as a field of power and choice nevertheless dominated by managers through specific projects in specific contexts Individual chapters relate bio economic projects to separate theoretical literature an approach that facilitates multi disciplinary dialog **Comprehensive Dissertation Index** ,1984 *The Book Review Digest* ,2003 *Books in Print Supplement* ,2002 **Surveyor and Municipal and County Engineer** ,1951
