Mega-Event Mobilities Noel B. Salazar, Christiane Timmerman, Johan Wets, Luana Gama Gato, Sarah Van den Broucke, 2016-12-01 Global sports events are rarely far from the public eye Such mega events are about much more than the sporting competitions themselves They entail global exposure and intense struggles by different stakeholders This is the first book to examine sports mega events from a mobilities perspective It analyses the mobile construction of global sports mega events and the role this plays in managing labour imaginaries policies and legacies In particular the book focuses on the tension between the various mobilities and immobilities that are implied in the process of constructing a mega event It seeks to uncover the ways in which an event is a series of fluid interactions that occur sequentially and simultaneously at multiple scales in diverse spheres of interaction Contributions explore the dynamics through which mega events occur revealing the textures and nuance of the complex systems that sustain them and the ways that events ramify throughout the international system , ICCWS2014- 9th International Conference on Cyber Warfare & Security Dr. Sam Liles, 2014-03-24 **A Fair Deal on Talent - Fostering Just Migration Governance** Bertelsmann Stiftung, 2015-05-12 If well managed migration generates benefits for migrants their countries of origin and the countries they settle in For migrants it can help them expand their skill sets and improve their standard of living For destination countries it can alleviate demographic pressures and foster cultural diversity For origin countries it can bring benefits associated with remittances and knowledge transfers However in reality these benefits are rarely achieved as migration policy failures frequently lead to suboptimal or even negative outcomes Realizing the full potential of migration therefore demands we foster a paradigm shift toward the fair management of migration Fair migration is driven by the desire to achieve a triple win for migrants destination countries and origin countries In addition to outlining the key challenges and opportunities associated with fair migration this volume examines the good practices of a variety of countries and institutions which highlight aspects of fair migration The volume concludes with policy recommendations for effective and fair migration policymaking at the national and international levels As a conceptual and empirical contribution to both national and international debates on managing migration this volume aims to enrich discussions among policymakers business leaders civil society actors and scholars alike Space in Holocaust Research Janine Fubel, Alexandra Klei, Annika Wienert, 2024-05-20 In recent years the issue of space has sparked debates in the field of Holocaust Studies The book demonstrates the transdisciplinary potential of space related approaches The editors suggest that spatial thinking can foster a dialogue on the history aftermath and memory of the Holocaust that transcends disciplinary boundaries Artworks by Yael Atzmony serve as a prologue to the volume inviting us to reflect on the complicated relation of the actual crime site of the Sobibor extermination camp to family memory archival sources and material traces In the first part of the book renowned scholars introduce readers to the relevance of space for key aspects of Holocaust Studies In the second part nine original case studies demonstrate how and to what ends spatial thinking in

Holocaust research can be put into practice In four introductory essays the editors identify spatial configurations that transcend conventional disciplinary chronological or geographical systematizations Fleeting Spaces Institutionalized Spaces Border ing Spaces Spatial Relations Drawing on a host of theoretical concepts and addressing various historical contexts as well as different types of media this book offers scholars and students valuable insights into cutting edge international scholarly debates

Fair Trade Rebels Lindsay Naylor, 2019-12-10 Reassessing interpretations of development with a new approach to fair trade Is fair trade really fair Who is it for and who gets to decide Fair Trade Rebels addresses such questions in a new way by shifting the focus from the abstract concept of fair trade and whether it is working to the perspectives of small farmers It examines the everyday experiences of resistance and agricultural practice among the campesinos as of Chiapas Mexico who struggle for dignified livelihoods in self declared autonomous communities in the highlands confronting inequalities locally in what is really a global corporate agricultural chain Based on extensive fieldwork Fair Trade Rebels draws on stories from Chiapas that have emerged from the farmers interaction with both the fair trade certified marketplace and state violence Here Lindsay Naylor discusses the racialized and historical backdrop of coffee production and rebel autonomy in the highlands underscores the divergence of movements for fairer trade and the so called alternative certified market traces the network of such movements from the highlands and into the United States and evaluates existing food sovereignty and diverse economic exchanges Putting decolonial thinking in conversation with diverse economies theory Fair Trade Rebels evaluates fair trade not by the measure of its success or failure but through a unique place based approach that expands our understanding of the relationship between fair trade autonomy and economic development

Patent Wars Thomas F. Cotter, 2018-06-01 Patents are ubiquitous in contemporary life Practically everything we use incorporates one or more patented inventions and recent years have witnessed epic disputes over such matters as the patenting of human genes the control of smartphone design and technology the marketing of patented drugs and the conduct of patent trolls accused of generating revenue from nuisance litigation But what exactly is a patent Why do governments grant them Can patents simultaneously encourage new invention while limiting monopoly and other abuses In Patent Wars Thomas Cotter one of America's leading patent law scholars offers an accessible lively and up to date examination of the current state of patent law showing how patents affect everything from the food we eat to the cars we drive to the devices that entertain and inform us Beginning with a general overview of patent law and litigation the book addresses such issues as the patentability

of genes medical procedures software and business methods the impact of drug patents and international treaties on the price of health care trolls and the smartphone wars Taking into account both the benefits and costs that patents impose on society Cotter highlights the key issues in current debates and explores what still remains unknown about the effect of patents on innovation An essential one volume analysis of the topic Patent Wars explains why patent laws exist in the first place and how we can make the system better
