Geofinance between Political and Financial Geographies Silvia Grandi, Christian Sellar, Juvavia Jafri, 2019-12-27 This edited collection explores the boundaries between political and financial geographies focusing on the linkages between the changing strategies policies and institutions of the state It also investigates banks and other financial institutions affected by both state policies and a globalizing financial system and the financial resources available to firms as well as households In so doing the book highlights how an empirical focus on the semi periphery of the financial system may generate new perspectives on the entanglement between geo politics and finance

Russian Environmental Politics Ellie Martus, 2017-07-06 Protecting the environment is a key issue for Russia with its vast wilderness areas and its economy's reliance on extractive industries which have the potential to cause massive pollution This book explores how policymaking works in Russia focusing on the important field of environmental policy It argues that contrary to the prevailing view that the presidency dominates the policy process with Putin making all major decisions or at least being the arbiter between conflicting parties policy is in fact made a range of competing interests including the bureaucracy and influential industry and industrial association lobbyists with relatively little intervention from Putin The book shows how although Russia does not have a strong civil society environmentalist views are represented through the institutionalized bureaucracy The book concludes that policy decision making in Russia is quite dispersed and not overcentralized

Push Back Judith Large, 2016-12-15 In 2009 after decades of conflict the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam Subsequently the state proved resistant to attempts by the UN and other international bodies to promote post war reconciliation or reform In this incisive new work Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts as well as exploring the wider context of rising Sinhalese nationalism the attendant growth of discrimination against minorities and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace Push Back is vital reading not only for those interested in Sri Lanka but also for those concerned about the wider

implications of the conflict for human rights peace making and geopolitics **Insight Turkey 2015 - Fall 2015 (Vol. 17, No. 4)** , Last year was the year of elections in Turkey with two parliamentary elections and months long electoral campaigns that dominated the political agenda of the country The parliamentary elections of June 7 2015 brought an end to the AK Party's 12 year long era of parliamentary majority and single party government in Turkey Nevertheless the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon The country was ruled by an AK Party led interim government and the elections were repeated five months later on November 1 2015 While close in time the two elections were quite distant with regard to the political contexts in which they were carried out and in their respective results The November elections witnessed a comeback for the AK Party which increased its votes by over 9 points with the addition of five million new votes in the ballot box **Handbook on the Geographies of Regions and Territories** Anssi Paasi, John Harrison, Martin Jones, 2018-07-27 This new international Handbook provides the reader with the most up to date and original viewpoints on critical debates relating to the rapidly transforming geographies of regions and territories as well as related key concepts such as place scale networks and regionalism Bringing together renowned specialists who have extensively theorized these spatial concepts and contributed to rich empirical research in disciplines such as geography sociology political science and IR studies this interdisciplinary collection offers fresh cutting edge and contextual insights on the significance of regions and territories in today's dynamic world **Deepening Neoliberalism, Austerity, and Crisis** Julien Mercille, Enda Murphy, 2015-07-07 From bank bailouts to austerity Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors financiers bankers and the privileged are protected The authors expose the class based nature of Ireland's crisis resolution *Intergenerational Mobilities* Lesley Murray, Susan Robertson, 2016-10-04 Drawing from work on mobilities and geographies of the lifecourse this collection is concerned with the ways in which age as a relational concept is constructed and played out in mobile urban space With studies of ageing and mobility often focusing on discrete age groups most notably children and older people this study seeks to fill a gap in existing literature by exploring mobility in relation to the lifecourse and generation looking not only at the margins Whilst some generations are increasingly mobile others are less so and this disparity in mobility opportunity is relational as age is relational This book addresses gaps in knowledge in relational geographies of ageing whilst contributing to literature on mobility and transport in particular the burgeoning field of mobility in justice Here mobility is considered in its broadest sense for example in relation to the movement or lack of movement of bodies and to computer mediated intergenerational communications Through focusing on urban mobile spaces from very local spaces of medical care to global spaces of migration that are the context for intergenerational mobilities this collection explores these interdependencies and considers ways in which intergenerational mobilities are conceptualised and researched *Routledge Handbook of National and Regional Ocean Policies* Biliana Cicin-Sain, David Vanderzwaag, Miriam

C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy. All chapters follow a common framework for policy analysis. While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping, fishing, oil and gas development, in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction. This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs. The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992, 2002 and 2012 sustainable development summits. The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated, precautionary and anticipatory. Overall, the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world. **Global Energy** Paul

Ekins, Mike Bradshaw, Jim Watson, 2015-09-17 Energy and access to energy are essential to human life, civilisation and development. A number of energy issues including energy security, energy prices and the polluting emissions for energy use now have high prominence on global agendas of policy and diplomacy. In addressing these and other global energy issues, the purpose of this book is to lay out the broad global energy landscape, exploring how these issues might develop in coming decades and the implications of such developments for energy policy. There are great uncertainties which will be identified in respect of some of these issues but many of the defining characteristics of the landscape are clear and the energy policies of all countries will need to be broadly consistent with these if they are to be feasible and achieve their objectives. The book therefore provides information about and analysis of energy and related resources and the technologies that have been and are being developed to exploit them that is essential to understanding how the global energy system is developing and how it might develop in the future. But its main focus is the critical economic, social, political and cultural issues that will determine how energy systems will develop and which technologies are deployed, why, by whom and who will benefit from them. The book has three Parts. Part I sets out the current global context for energy system developments, outlining the essential trends of global energy supply and demand and atmospheric emissions from the past and going forward and their driving forces. Part II explores the options and choices covering both energy demand and energy supply facing national and international policymakers as they confront the challenges of the global context outlined in Part I. Part III of the book brings together the discussion in Parts I and II with consideration of possible global energy and environmental futures and of the energy policy

choices which will determine which future actually comes to pass

Until We Have Won Our Liberty Evan

Lieberman, 2024-09-24 A compelling account of South Africa's post Apartheid democracy At a time when many democracies are under strain around the world *Until We Have Won Our Liberty* shines new light on the signal achievements of one of the contemporary era's most closely watched transitions away from minority rule South Africa's democratic development has been messy fiercely contested and sometimes violent But as Evan Lieberman argues it has also offered a voice to the voiceless unprecedented levels of government accountability and tangible improvements in quality of life Lieberman opens with a first hand account of the hard fought 2019 national election and how it played out in Mogale City a post Apartheid municipality created from Black African townships and White Afrikaner suburbs From this launching point he examines the complexities of South Africa's multiracial society and the unprecedented democratic experiment that began with the election of Nelson Mandela in 1994 While acknowledging the enormous challenges many South Africans continue to face including unemployment inequality and discrimination Lieberman draws on the country's history and the experience of comparable countries to demonstrate that elected Black led governments have without resorting to political extremism improved the lives of millions In the context of open and competitive politics citizens have gained access to housing basic services and dignified treatment to a greater extent than during any prior period Countering much of the conventional wisdom about contemporary South Africa *Until We Have Won Our Liberty* offers hope for the enduring impact of democratic ideals

The Local Impact of Globalization in South and Southeast Asia Bart Lambregts, Niels Beerepoot, Robert C. Kloosterman, 2015-08-27

In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects This book examines how this next wave in globalization affects people and places in South and South East Asia It brings together twelve case studies from India the Philippines China Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic

development and contemporary transformations in South and South East Asia *The End of Development* Andrew Brooks, 2017-05-15 Why did some countries grow rich while others remained poor Human history unfolded differently across the globe The world is separated into places of poverty and prosperity Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography Andrew Brooks rejects popular explanations for the divergence of nations This accessible and illuminating volume shows how the wealth of the West and poverty of the rest stem not from environmental factors or some unique European cultural social or technological qualities but from the expansion of colonialism and the rise of America Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years After the Second World War international aid projects failed to close the gap between developed and developing nations and millions remain impoverished Rather than address the root causes of inequality overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries But this flawed form of development is now coming to an end as the emerging economies of Asia and Africa begin to assert themselves on the world stage *The End of Development* provides a compelling account of how human history unfolded differently in varied regions of the world Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty as the alternative is to accept that impoverishment is somehow part of the natural order of things **Tajikistan on the Move** Marlene Laruelle, 2018-05-25 The southernmost and poorest state of the Eurasian space Tajikistan collapsed immediately upon the fall of the Soviet Union and plunged into a bloody five year civil war 1992-1997 that left more than 50 000 people dead and more than half a million displaced After the 1997 Peace Agreements Tajikistan stood out for being the only post Soviet country to recognize an Islamic party the Islamic Renaissance Party of Tajikistan IRPT as a key actor in the civil war as well as in postwar reconstruction and democratization Tajikistan's linguistic and cultural proximity to Iran notwithstanding the balance of external powers over the country remains fairly typical of Central Asia with Russia as the major security provider and China as its principal investor Another specificity of Tajikistan is its massive labor migration flows toward Russia Out of a population of eight million about one million work abroad seasonally one of the highest rates of departure in the world Migration trends have impacted Tajikistan's economy and rent mechanisms half of the country's GDP comes from migrant remittances a higher share than anywhere else in the world However it is in the societal and cultural realms that migration has had the most transformative effect Migrants cultural and societal identities are on the move with a growing role given to Islam as a normative tool for regulating the cultural shock of migration Islam and especially a globalized fundamentalist pietist movement regulates both physical and moral security in workplace and other settings and brings migrants together to make their interactions meaningful and socio politically relevant It offers a new social prestige to those who work in an

environment seen as threatening to their Islamic identity The first section of this volume investigates the critical question of the nature of the Tajik political regime its stability legitimacy mechanisms and patterns of centralization In the volume s second part we move away from studying the state to delve into the societal fabric of Tajikistan shaped by local rural specificities and social vulnerabilities in the health sector and gender relationships The third section of the volume is devoted to identity narratives and changes While the Tajik regime works hard to control the national narrative and the interpretation of the civil war society is literally and figuratively on the move as migration profoundly reshapes societal structures and cultural values

Political Ecologies of Meat Jody Emel,Harvey Neo,2015-05-15 Livestock production worldwide is increasing rapidly in part due to economic growth and demand for meat in industrializing countries Yet there are many concerns about the sustainability of increased meat production and consumption from perspectives including human health animal welfare climate change and environmental pollution This book tackles the key issues of contemporary meat production and consumption through a lens of political ecology which emphasizes the power relations producing particular social economic and cultural interactions with non human nature Three main topics are addressed the political ecology of global livestock production trends changes in production systems around the world and their implications for environmental justice and existing and emerging governance strategies for meat production and consumption systems and their implications Case studies of different systems at varying scales are included drawn from Asia Africa the Americas and Europe The book includes an editorial introduction to set the context and synthesize key messages for the reader

Handbook of Research methods and Applications in Environmental Studies Matthias Ruth,2015-08-28 This Handbook presents methods to advance the understanding of interdependencies between the well being of human societies and the performance of their biophysical environment It showcases applications to material and energy use urbanization and tech

Handbook on Geographies of Technology Barney Warf,2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world It shows how geography and technology are intimately linked by examining the origins growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society

Global Governance and India's North-East Ranabir Samaddar,Anita Sengupta,2019-06-04 This book maps the convergence of governance and connectivity within Asia established through the spatial dynamics of trade capital conflict borders and mobility It situates Indian trade and governance policies within a broader Asian and global context Focussing on India s North East in particular on India s Look and Act East Policy the volume underscores how logistical governance in the region can bring economic and political transformations It explores the projected development of the North East into a gateway of transformative cultural interaction among people just as the Silk Road became a conduit for Buddhism to travel along with musical instruments and tea Comprehensive and topical this book will be useful for scholars and researchers of political studies international relations

governance studies development studies international trade and economics and for think tanks working on South and Southeast Asia *Handbook on the Geographies of Money and Finance* Ron Martin, Jane Pollard, 2017-03-31 The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development *Russia's Response to Sanctions* Richard Connolly, 2018-07-05 In the first in depth analysis of the effects of sanctions on the Russian political economy Richard Connolly details the Western sanctions targeting the energy defense and financial sectors and the Russian response He explores how the Western sanctions have caused Russian officials to formulate rapid policy responses to enable the country to adapt to the new circumstances The sanctions and the Russian response have caused the state's role in the Russian economy to grow stronger and caused its policymakers to accelerate efforts to shift Russia's foreign economic relations away from the West and toward Asia Connolly analyzes how the political economy in Russia and the nature of the country's integration with the global economy have been fundamentally reshaped He demonstrates that a new system of political economy is emerging in Russia and how it is crucial to understanding Russia's future trajectory
