

IGCSE Geography Notes written by STRAIGHT As STUDENT!!

Sampling

(coast edition!!)

Systematic– taking samples at regular intervals

Why might systematic sampling be better than random sampling?

- Yields unbiased results
- Quicker to choose and locate sites

Bi-polar survey

As a team, what should students decide on in planning a bi-polar survey?

- Decide on a scoring system
- What forms of litter to measure in a survey
- What area to be covered at each side
- When to carry it out
- How long to carry it out for

Beach profiles

Why do we measure beach profiles?

To survey the morphology (structure/elevation) of a beach and compare that to other beaches or coastlines, as well as examining correlation between beach processes and sediments.

Measuring the beach profile

1. Mark the line of the transect
2. Stick ranging pole into the beach at the water's edge
3. Measure 10m up the beach and stick other measuring pole into sand
4. Use clinometer to measure angle between poles
5. Record angle and repeat along the transect line
6. Repeat for other transect lines

Process

1. Lay tape measure along transect line
2. Place poles at equal distances apart
3. Measure distances between ranging poles
4. Measure and record the angle using the clinometer

**Covering common
questions compiled
from past year papers.**

**Hit all the markscheme
points immediately!**

Contents:

- 8 pages worth of notes (created from doing past papers and marking them myself) covering a range of questions. Very concise, to the point.
- shared online, by Google docs.
- One-time purchase, infinite access!
