## **Geography Papermemo 2012:**

Saving More Than Seeds Catherine Phillips, 2016-04-01 *Saving More Than Seeds* advances understandings of seed people relations with particular focus on seed saving. The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socio-natural conditions. But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation. Combining original ethnographic research with investigation of an evolving corporate seed order, this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking, genetic engineering, intellectual property rights and agrifood regulations. Drawing on diverse social sciences literatures, Phillips illustrates ongoing practices of thinking, feeling and acting with seeds, raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures.

*An Uncertain Glory* Jean Drèze, Amartya Sen, 2013-08-11 Why India s problems won t be solved by rapid economic growth alone When India became independent in 1947 after two centuries of colonial rule it immediately adopted a firmly democratic political system with multiple parties freedom of speech and extensive political rights The famines of the British era disappeared and steady economic growth replaced the economic stagnation of the Raj The growth of the Indian economy quickened further over the last three decades and became the second fastest among large economies Despite a recent dip it is still one of the highest in the world Maintaining rapid as well as environmentally sustainable growth remains an important and achievable goal for India In *An Uncertain Glory* two of India s leading economists argue that the country s main problems lie in the lack of attention paid to the essential needs of the people especially of the poor and often of women There have been major failures both to foster participatory growth and to make good use of the public resources generated by economic growth to enhance people s living conditions There is also a continued inadequacy of social services such as schooling and medical care as well as of physical services such as safe water electricity drainage transportation and sanitation In the long run even the feasibility of high economic growth is threatened

by the underdevelopment of social and physical infrastructure and the neglect of human capabilities in contrast with the Asian approach of simultaneous pursuit of economic growth and human development as pioneered by Japan South Korea and China In a democratic system which India has great reason to value addressing these failures requires not only significant policy rethinking by the government but also a clearer public understanding of the abysmal extent of social and economic deprivations in the country The deep inequalities in Indian society tend to constrict public discussion confining it largely to the lives and concerns of the relatively affluent Dr ze and Sen present a powerful analysis of these deprivations and inequalities as well as the possibility of change through democratic practice      *The EU's Eastern Neighbourhood* Ilkka Liikanen,James W. Scott,Tiina Sotkasiira,2016-07-01 The collapse of the Soviet Union has had profound and long lasting impacts on the societies of Eastern Europe the South Caucasus and Central Asia impacts which are not yet fully worked through changes in state society relations a comprehensive reconfiguration of political economic and social ties the resurgence of regional conflicts frozen during the Soviet period and new migration patterns both towards Russia and the European Union At the same time the EU has emerged as an important player in the region formulating its European Neighbourhood Policy and engaging neighbouring states in a process of cross border regional co operation This book explores a wide range of complex and contested questions related to borders security and migration in the emerging European Neighbourhood which includes countries of the Caucasus and Central Asia as well as the countries which immediately border the EU Issues discussed include new forms of regional and cross border co operation new patterns of migration and the potential role of the EU as a stabilizing external force      *Taken for a Ride* Matteo Rizzo,2017 How does public transport work in an African city under neoliberalism Who owns what in it Who has the power to influence its shape and changes in it over time What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam These are the main questions that inform this in depth case study of Dar es Salaam s public transport system over more than forty years The growth of cities and informal economies are two central manifestations of globalization in the developing world Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system s journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector The book ends with an analysis of the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it Taken

for a Ride is an interdisciplinary political economy of public transport exposing the limitations of market fundamentalist and postcolonial approaches to the study of economic informality the urban experience in developing countries and their failure to locate the agency of the urban poor within their economic and political structures It is both a contribution to and a call for the contextualised study of neoliberalism *European Products* Gisela Welz, 2015-09-01 On the Mediterranean island of Cyprus rural villages traditional artefacts even atmospheres and experiences are considered heritage Heritage making not only protects but also produces things people and places Since the Republic of Cyprus joined the European Union in 2004 heritage making and Europeanization are increasingly intertwined in Greek Cypriot society Against the backdrop of a long term ethnographic engagement the author argues that heritage emerges as an increasingly standardized economic resource a European product Implemented in historic preservation rural tourism culinary traditions nature protection and urban restoration projects heritage policy has become infused with transnational market regulations and neoliberal property regimes **The Cambridge Economic History of Modern Britain** Roderick Floud, Jane Humphries, Paul

Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors **The War Lawyers** Craig Jones, 2020-11-26 Over the last 20

years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers *The War Lawyers* examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

*Exclusion and Inclusion in International Migration: Power, Resistance and Identity* Armağan Teke Lloyd, 2019-04-30

People on the move face new barriers in a globalizing world. Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants. Notwithstanding the forces of globalization, states have maintained their monopoly power over whom to admit and whom to deny within their borders. In other words, they remain the sovereign authority regulating the entry and exit of people. However, in recent years, a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security. The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism, instability and criminality. The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced. These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone. This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants, although the focus is largely on the former. Despite the fact that most of the empirical studies are drawn from within Europe, the book also includes research on Nepal, Australia, the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this.
