Big Data, Algorithms and Food Safety Salvatore Sapienza, 2022-10-20 This book identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of

meaningful inferences from data. However, conflicting interests and tensions among the parties involved are hindering efforts to find shared methods for steering the processing of Big Data in a sound, transparent and trustworthy way. While consumers call for more transparency, food business operators tend to be reluctant to share informational assets. This has resulted in a considerable lack of trust in the EU food safety system. A recent legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain. While this regulatory approach is being established, breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning. The book focuses on two core topics: data ownership and data governance, by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied, significant and overlooked domain. To do so, it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union, while also assuming an ethical perspective when exploring potential solutions. The conclusion puts forward a proposal: an ethical blueprint for identifying the principles Security, Accountability, Fairness, Explainability, Transparency and Privacy to be observed when processing Big Data for food safety purposes, including by means of machine learning. Possible implementations are then discussed, also in connection with two recent legislative proposals, namely the Data Governance Act and the Artificial Intelligence Act.

Borders Alexander C. Diener, Joshua Hagen, 2024 This second edition of *Borders A Very Short Introduction* challenges the perception of borders as passive lines on a map revealing them instead to be integral forces in the economic social political and environmental processes that shape our lives

Beyond Instrumentalised Politics Garrett Thomson, Scherto Gill, 2024-05-06 Political thinking tends to outline reforms to existing political institutions In contrast *Beyond Instrumentalised Politics* argues for the need for systemic transformation It articulates the evaluative principles for good governance and employs these principles to argue for a new political system Because persons are non instrumentally valuable good governance requires that all people are respected equally and this necessitates a participatory democracy The book investigates how such a democracy might function through consensus based decision making and argues for a redefinition of consensus It characterises the local and national institutions required for public governance thus conceived This includes the creation of various types of spaces for deep dialogue and mutual inquiry This book demonstrates how this innovative vision would transform our current conceptions of governance

Migrants Before the Law Tobias G. Eule, Lisa Marie Borrelli, Annika Lindberg, Anna Wyss, 2018-11-19 This book traces the practices of migration control and its contestation in the European migration regime in times of intense politicization The collaboratively written work brings together the perspectives of state agents NGOs migrants with precarious legal status and their support networks collected through multi sited fieldwork in eight European states Austria Denmark Germany Italy Latvia Lithuania Sweden and Switzerland The book provides knowledge of how European migration law is implemented used and challenged by different actors and of how it lends and constrains power over migrants journeys and prospects An ethnography of law in action the book contributes to socio legal scholarship on migration control at the margins of the state This book is a major achievement A remarkable and insightful study that through close analysis of the practices of migration control in 8 European countries Austria Denmark Germany Italy Latvia Lithuania Sweden and Switzerland provides powerful new insight into the power of the state at its margins and over those that are marginalised Andrew Geddes Director Migration Policy Centre European University Institute *Migrants Before the Law* provides a much needed account of the dizzying legal labyrinth that migrants navigate as they seek to survive in Europe Based on multi sited ethnography in detention centres migration offices police stations and non governmental organizations as well as on interviews with key government actors advocates and migrants themselves this book explores the systems of control and forms of migrant precarity that operate along Europe s internal borders in multiple national and transnational contexts Readers will come away with a deepened understanding of the perverse workings of power the ways that the uncertainty and unpredictability of law foster both despair and hope the degree to which the immigration crisis is both manufactured and experienced as real and the ingenuity of migrants themselves in the face of Kafkaesque state practices Susan Bibler Coutin Professor of Criminology Law and Society and

Anthropology University of California Irvine USA *Migrants Before the Law* is an excellent exposition of the dispersed sites of the law and the hinges and junctions through which this apparatus is actualized in the lives of migrants facing deportation contesting their status as illegal migrants or seeking to regularize their precarious position Written with great sensitivity and an eye to minute details this book is also an achievement in furthering the method of collaborative ethnography and new ways of staging comparisons Veena Das Krieger Eisenhower Professor of Anthropology Johns Hopkins University USA

Sustainable Aquaculture Faisal I. Hai, Chettiyappan Visvanathan, Ramaraj Boopathy, 2018-03-02 This book is about important relevant recent research topics in sustainable aquaculture practices A critical assessment of the sustainable fishing methods and the aspect of sustainable aquaculture feed is presented in this volume A special focus has been given to socio economic and environmental assessment of aquaculture practices and analysis of carbon footprint under an intensive aquaculture regime Aquaponics as a niche for sustainable modern aquaculture has been highlighted The effect of use of pharmaceuticals to prevent fish disease on the surrounding marine environment is an emerging area of concern and a critical discussion on this aspect is included in the book The spread of organic waste and nutrients released by fish farms to natural water bodies has raised considerable concerns Therefore the methods to prevent their dispersion and removal treatment have been comprehensively covered in this book This book is an essential read for academicians researchers and policy makers in the field of aquaculture

Privacy on the Ground Kenneth A. Bamberger, Deirdre K. Mulligan, 2015-10-23 An examination of corporate privacy management in the United States Germany Spain France and the United Kingdom identifying international best practices and making policy recommendations Barely a week goes by without a new privacy revelation or scandal Whether by hackers or spy agencies or social networks violations of our personal information have shaken entire industries corroded relations among nations and bred distrust between democratic governments and their citizens Polls reflect this concern and show majorities for more broader and stricter regulation to put more laws on the books But there was scant evidence of how well tighter regulation actually worked on the ground in changing corporate or government behavior until now This intensive five nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work and what kinds of regulation effectively shape their behavior And the research yields a surprising result The countries with more ambiguous regulation Germany and the United States had the strongest corporate privacy management practices despite very different cultural and legal environments The more rule bound countries like France and Spain trended instead toward compliance processes not embedded privacy practices At a crucial time when Big Data and the Internet of Things are snowballing *Privacy on the Ground* helpfully searches out the best practices by corporations provides guidance to policymakers and offers important lessons for everyone concerned with privacy now and in the future
